

# Newfoundland Club of America, Inc.

Board of Directors

February 16, 2012

8:00 pm Eastern Time/ 7:00 pm Central Time

## Agenda

1. **Reading of the minutes of last meeting**
  - Approval of the minutes of December 15, 2011
  - Approval of the minutes of January 19, 2012
2. **President's Report (Pat Randall)**
  - Showsight magazine articles
  - Letter from member regarding *Annual of Titlists*
3. **1<sup>st</sup> Vice-President's Report (Roger Frey)**
  - Correspondence regarding vendors at National Specialties
4. **2<sup>nd</sup> Vice-President's Report (Pam Saunders)**
  - All report items are included under Committee Discussions
5. **Recording Secretary's Report (Mary Lou Cuddy)**
  - Prepared the February 16, 2012 agenda packet
  - Prepared the minutes of the December 15, 2011 and January 19, 2012 meetings
  - Election report
6. **Corresponding Secretary's Report (Lynne Anderson-Powell)**
  - Input regarding the forwarding of complaints to the Arbitration Committee
7. **Treasurer's Report (Mary L. Price)**
8. **AKC Delegate's Report (Mary W. Price)**
  - #1: the election of three persons to serve four-year terms as members of the AKC Board of Directors, Class of 2016;
  - #2: the Group Realignment Proposal, in part to accommodate the expected increase in AKC recognized breeds;
  - #3: the proposed amendment to the Dog Show Rules allowing for the awarding of points to the Reserve Winners at national specialty shows.
9. **Committee Reports**
  - Judges Education Committee:
    - *Showsight* articles approvals

- Juniors Committee: (from 1/19/12)
  - Results of Juniors Committee internal survey
  - Proposed new award certificate for approval
  - Juniors Event Passport
- Steering Committee: (from 1/19/12)
  - Proposal for Board Advisory Group
- Publicity Committee: (from 1/19/12)
  - Proposed revised job description
  - Committee report
- Judges Education Committee: (from 1/19/12)
  - Revised Temperament article for approval
- Electronic Publications Policy Committee:
  - Electronic forum footnotes & discussion
- Membership Committee:
  - Member request for the membership directory in an electronic format.
  - Approval of dues renewal form
- Breeders Education Committee:
  - Response to Newfoundland Puppy Facebook page
- Working Dog Committee:
  - Water Test Regulations (including WRDX)
  - 2 small draft test clarifications
  - Pilot WRD requalification-only test
- Rescue Prevention Committee:
  - Requests BOD direction in regards to updating NCA articles
- Newf Tide Policy Committee:
  - Report on including ROM's in *Annual of Titlists*
- Regional Club Committee:
  - Marketing of the NCA at Regional Clubs
- Legislative Committee:
  - Bring in a speaker to the annual meeting
  - Recruit new members to the committee
  - Develop a NCA legislative blogsite.
- Newfoundland Ambassador Committee:
  - Proposal for Regional Clubs
- Regional Club Liaison: (from 1/19/12)
  - Northstar Constitution & Bylaws revision

## **10. Executive Session**

- Approval of NCA Applicants
- Governance Committee: Request for committee appointment
- Working Dog Committee: Request to advertise committee vacancy
- Legislative Committee: Request to advertise committee vacancy
- Rescue Prevention Committee: Request to advertise committee vacancy

## **11. Unfinished Business**

- Report on the motion regarding the recounting of election ballots (Steve Britton)

## 12. New Business

- Motion: For the purpose of formulating applicable club policies in the areas of Conflict of Interest, Document Retention, Whistle-blower Protection, and any other area related area, I move that a copy of Section VI of the IRS Form 990 be referred to the Governing Documents Committee. Further, that the committee report back to the Board at the Fall 2012 Face to Face Meeting regarding any suggested policy changes. (Steve Britton)
- Motion: Many of the articles on our website found under *Taking Care of Your Newf (Newf Know How)* are outdated and/or contain incorrect information. I move these articles be reviewed and updated. (Maredith Reggie)
- Motion: Ratify the change of date for the 2013 National Specialty (Steve Britton)
- Discussion Item: I think we should discuss the AKC's request for electronic submission of club membership lists. There was a concern expressed and on the Board's agenda a while ago about AKC using the NCA membership data to do marketing for both AKC and their partners. I am not sure what we have provided in the past, but the AKC does allow us to just provide a member's name and postal code and no phone or email. They also now have a process to upload this data using a new "tool". It requires the data to be in a specific format and I suspect there are some hidden "gotchas" that may need to be handled. I would be happy to help with this to facilitate this, if needed (Lynne Anderson-Powell)
- Discussion Item: Clarification of the publication in *Newf Tide* of judges who have attended the Judges Education Seminar at National Specialties. (Maredith Reggie)  
(page )

## 13. Adjournment

## 14. FYI

- Board/Committee Item List
- Board Directory

## COMMITTEE DISCUSSIONS

**JUDGES EDUCATION COMMITTEE:** *Time sensitive – MUST COMPLETE AT TELECONFERENCE!!*

**DISCUSSION OF SHOWSIGHT ARTICLES – TO BE SUBMITTED TO THE BOD BY FEBRUARY 16<sup>TH</sup> AND WILL BE SENT SEPARATELY IN AN EMAIL.**

**JUNIORS COMMITTEE:** Held over from January teleconference  
*Below submitted by Junior's Chair – Cissy Sullivan.*

Wanted to make sure I did not miss the upcoming deadline so I am sending a few items to be considered for the agenda during the January Teleconference.

- First, is the Junior Committees questionnaire regarding our thoughts about membership and etc.
- Second, is a sampling of the new award certificates that I have designed. If these meet with approval I will have them printed.
- Third, is just a FYI for the Board as to how the Event Passports for Juniors registered at the Specialty turned out.

Thank you to the Board for their support and help.

Questions asked of the Jr. Committee Members: 5 members responded.

**1. Question: Should Jrs. be included within their parents' membership?**

Four members said no. Individual JR. Membership gives ownership and their own identity. It is important to build confidence and character.

One member felt that there should be a Family membership. This member realizes that doing this would entail a by- laws change. The same member suggested that an alternative could be including minor children in their parents' membership fee.

**2. Question: Only Junior Members at the present are eligible for Jr. Awards, stipends, and scholarships should this change?**

Four members said that present policy should be followed. BUT as new members to this committee and the new Chair to the committee it leaves a sour note, as past practice has not been in alignment with written policy.

SUGGESTION: a statement from the NCA Board when the new memberships/or renewals of memberships go out explaining specifically this policy. This might also be sent to each Regional club to be posted in their newsletters. The same specifics to be published in Newf Tide and in the Enotes. Consistency must take place so that everyone is treated fairly and on the same playing field. Some parents thought that their children were part of their adult memberships. Like in regional clubs the category of Family membership.

All Five responders believe strongly that all children who have put out effort to participate in conformation, obedience or working events should be acknowledged.

SUGGESTION: Leave the policy statement about only Jr. Members being eligible for the top three awards, and stipends (scholarship decision comes from CTMB I believe), but

make certificates of participation for ANY child who has participated in an event documented throughout that year.

3. **Question: Should Newf Tide be an additional cost to a Jr. Membership (It is now).** Four members answered that it should NOT be an additional cost, sighting that Newf Tide is included within the adult membership costs.
  
4. **Question: Should Only Registered Jrs. (they do not have to be Jr. MEMBERS just registered for the National) be eligible to participate in all the activities?** All Five responders said YES they believe the children need to be registered to participate. HOWEVER they also feel that we are trying to ENCOURAGE more kids to join in. Suggestion: To have an on- site registration. \* In speaking with Mary Jane Spackman and gaining input from her in regards to this, she also agreed that any child between the ages of 8-18 needs to be registered to participate. She also agrees whole heartedly that we need to keep enticing more Jrs. to attend and participate. She is willing to work with us to have an on- site registration available for Jrs. who are not registered. Suggestion: POSSIBLY when adults who have 8-18 yr. olds arrive to pick up their registration bags, they could be asked IF they would like to register them for the Jr. activities. The same registration fee would apply. Once again wanting everyone to be treated alike and fairly. It would be a planning nightmare if we did not have some sort of a head count. We have items that need to be ordered well in advance and we certainly do not wish to be caught short on supplies. All registered children will participate in all activities at the Specialty NO MATTER WHAT THEIR MEMBERSHIP STATUS IS. **On Site registration has been spoken about to Susie and it is in the works to be offered.**
  
5. **Question: Should there be any changes made to the ages of Jr. Participants:** Four committee members as well as MJS said no keep it consistent with the age guide lines already in place. 8-18. (Someone mentioned that this is not a babysitting service, it truly has goals and visions.) One additional comment: IF a change was made to allow younger children a parent would need to be in attendance as well. The consensus was leaving it the same.

*This certificate is  
awarded to*

*For excellent  
participation in  
AKC Conformation during the year of  
2011. Congratulations!*

*Signed:*

## **STEERING COMMITTEE:** Held over from January teleconference *Submitted by Chris Plum – Steering Committee Chair*

RE: Proposal for a Group of Advisors to be available to the NCA Board and its Various Committees

The Steering Committee has developed the proposal below and unanimously voted at its last meeting on December 8, 2011 to request that the Board consider the proposal. Our recommendation is that you accept the proposal and provide us with directions regarding what you would like the Steering Committee to do next to develop this concept. Of course, the proposal may be rejected or modified. In any case, the Steering Committee will follow the direction given to it by the Board of Directors.

### Our Motion:

The Steering Committee recommends that a number of independent professional advisors be identified and a 'retainer' arrangement be created with each of them individually. The purpose of the advisors is to provide the Board with a ready resource for professional advice on an as needed basis.

If the Board accepts this motion, the Committee would like the Board's direction on which types of advisors (of those listed below or others that might be identified by the Board) should be investigated further.

### Our Reasoning:

There is not a current driving issue for any particular advisor; rather we believe it would be prudent for the Board to identify and create a business relationship, perhaps including a retaining fee, prior to an urgent need arising. One might imagine that advisors could provide valuable information and guidance on issues related to long term projects, new initiatives, management of professional vendors and risk management.

We note that the Board has a well-established relationship with an attorney, and this recommendation suggests building on that concept.

The NCA is an organization of members brought together by their commitment to the Newfoundland Dog. The membership of the NCA is filled with talented individuals, many of whom volunteer their time and expertise to the club. It is also an organization with significant financial assets and responsibilities. The qualities and motivating forces which make a person want to serve the NCA do not necessarily mean that persons with the expertise to deal with the specialized

business issues which sometimes arise will be those who have chosen to serve the NCA. For this reason, we believe the NCA Board would be well served by access to professional consultants. Individual advisors would provide services to the Board when requested. It is not a group which meets on its own, rather is a group of independent, individual professionals; (thus it is like a person who has a doctor, lawyer, dentist and accountant – all of them are available for advice, but they do not get together as a group to discuss the person).

The following is a preliminary list of professional the committee feels would be of value to the organization, and the areas where they would be able to provide expertise. The committee would like the Board’s direction on which types of advisors (of those listed or others that might be identified by the Board) should be investigated further.

Advisor	When they would be consulted
Financial planner or other financial advisor	<ul style="list-style-type: none"> <li>• Advise charitable trust on percentage of endowment to spend each year;</li> <li>• Comment on investment and cash management;</li> <li>• Carry out financial analysis on request (for example, what is the impact on the club of membership declining by 20 members a year; should dues be raised by \$5; etc.)</li> <li>• Audit services. A full audit every so often is good for the club and the Treasurer but is not needed every year. If the CT wishes to avail itself of donor opportunities such as the Combined Federal Campaign, a full yearly audit is required.</li> <li>• Investment and wealth management. In today markets CDs may not be the best option.</li> </ul>
Project Manager	<ul style="list-style-type: none"> <li>• Advise on new projects, such as the database;</li> <li>• Maintain “big picture” project overview in cases where volunteer staffing changes.</li> <li>• Health challenge logistics</li> <li>• Creation of printed materials</li> </ul>
Risk manager	<ul style="list-style-type: none"> <li>• Assess financial risk of events and activities, for example committing to a long term contract; sponsoring or holding an event where members of the public are in contact with dogs</li> <li>• Insurance coverage what’s good enough and what’s not.</li> </ul>

Communications manager	<ul style="list-style-type: none"> <li>• See posting in most recent Newf e-Notes.</li> <li>• Building and maintaining the NCA brand. An example is building awareness of the NCA with all Newf owners, not just club members.</li> <li>• Advice on any interaction with the media (good or bad) Dealing with the media is not a talent that most of us have and most of us need help when dealing with them.</li> </ul>
Event Planner	<ul style="list-style-type: none"> <li>• Assist in the logistical aspects of planning National Specialties – hotels, room rates, meeting/banquet set-up, equipment rentals – those aspects of the National Specialty that are not dog-show specific.</li> <li>• Assist in planning the Fall Face to Face meeting to optimize rates, etc.</li> </ul>

**PUBLICITY COMMITTEE:** Held over from January teleconference with revised job description proposed from committee

*Submitted by Hope Taylor – Chair*

First of all I would like to thank the Board of Directors for their vote of confidence in appointing me as the Publicity Chair. Since this is a new position and uncharted territory per se for NCA, I am inclined to proceed as if NCA were any other company/business. Publicity will be utilized to promote the Newfoundland Club of America in the public's eye. This can be accomplished by using press releases, TV, radio, newspaper, direct mail and handouts.

Attached is a revised proposal for the Board. I looked on the internet for a job description of Public Relations so I included that along with how that description applies to the NCA.

In researching all of this I discovered that there were several people already doing PR within the club. We feel strongly that there is too much overlap in this especially if material is going to out to the public. If at this time the Board feels that they are not quite ready for a full commitment for a Public Relations Committee, we understand and it can be put on hold.

Would appreciate your feelings on the attached.

Thank you,  
Hope Taylor

**TO: NEWFOUNDLAND CLUB OF AMERICA, BOARD OF DIRECTORS, February 2012**

## **PUBLIC RELATIONS JOB DESCRIPTION**

A public relations professional builds awareness and interest, serves as a spokesperson and manages the flow of information to the public for a person, product or company. He is an effective communicator in print, person and on the phone. A successful campaign presents a client in the best possible light. Traditionally this is accomplished by sending press releases to journalists and placing stories in print and broadcast media and on the internet. A press release conveys a message, resembles a news story in format. A public relations pro focuses on getting free media exposure. Written materials may include press releases, press kits (personnel biographies, company history, fact sheet), speeches, newsletters, feature articles, website content, event listing, proposals and persuasive pitch letters to journalists and TV producers convincing them to run a story on your client.

*This was taken directly from*

[www.ehow.com facts\\_4924808\\_public-relations-job-description](http://www.ehow.com facts_4924808_public-relations-job-description)

### **HOW THE PUBLIC RELATIONS JOB DESCRIPTIONS APPLIES TO NCA: (For right now)**

1. **REGIONAL CLUBS:** Write articles that would be published in the regional club's newsletters. These articles would concentrate on what the Newfoundland Club of America is doing, has done or is planning on doing. In doing this we are engaging those members of the regional clubs who are not members of NCA, yet! Let those people know all the good the NCA does such as sponsoring health studies, tests etc. PR could also guide the regional clubs in promotions and printed materials to promote their individual clubs and NCA. A promotional package could be put together for the regional clubs per the BOD's approval.
2. **2012 NATIONAL SPECIALTY:** The Specialty is less than four months away and thus a priority for Public Relations. I would like to contact NCA's own member photographers to see if we can use some of their photographs for press release, for now and in the future. (Pam told me to contact Meredith Reggie, for she has a wealth of information.)  
PR needs to research Carlisle, PA and surrounding area for Chamber of Commerce's, Merchants Associations, City Halls, Mayor's Office and send press release along with a special invitation to attend the Specialty. Maybe have the Mayor of Carlisle help hand out awards. Get the Towns involved! Check with the utility company in Carlisle to see if they would be willing to hang a sign in town for us such as "Newfoundland Club of America National Specialty this week". This way it could be used for several years.  
Press releases would also be sent to the local newspapers, TV and radio stations in the area. This would be sent by snail mail with follow-ups done by email. In these press release emphases would be on the show itself but also the history of the breed along with all the good that the NCA does in promoting health testing, supporting health research and rescue. We would like to also find a NCA member in the area that could visit the above medias with their Newfoundland, there is probably a morning show that would love to have us on. Flyers of the show could be handed out to the shops in town. We would need flyers on the grounds of the show itself showing people where everything is located and also the do's and don'ts at a dog show.
3. Recording of important wins and accomplishments of our dogs and members should be the responsibility of another committee but that committee should forward special accomplishments and photos that can be used for press releases which can be sent to local

newspapers etc. A special member section on the websites of both national and regional websites that can showcase those special people and dogs.

Whatever the Board chooses to approve or not there are a couple of things that should be considered. Everything that has to do with Public Relations should come from the same location. Consistency is the key to any promotion. We do not need different people putting out different things and therefore the left hand does not know what the right hand is doing. Therefore I strongly believe that the Public Relations Committee should be in charge of all publicity and if a committee has a PR person then that person should be under the auspice of the Public Relations Committee. That person, for that specific time would be in the PRC and the planning of the PR would be in the hands of four people instead of three and all PR would be approved by the Board. Secondly, Public Relations is not the same as Advertising. Normally Public Relations is free press whereas Advertising cost money. If the Board would like for us to handle the advertising that would be great since we all have advertising experience. I, myself have 30 years in advertising and PR. If you combine the two, it could be called the Promotions Committee and it could encompass everything.

In closing, I know this is a lot to go over and decide on but it is a very important committee...it is putting the NCA out there to bring public awareness to our club, our breed and our members. We can take this as far as the Board would like us to.

If the Board needs time and would like to just put the committee on hold, the members of the committee understands.

The Committee will need NCA stationary, folders for the press releases, business cards and items to include with the press releases such as Newfie stuffed animals and NCA coffee mugs.

Respectfully,

Hope Taylor

### **JUDGE'S EDUCATION COMMITTEE:** Held over from January

*Below is the re-worked Temperament article from JEC. This article was voted unanimously by the committee ( with 1 member absent)*

#### **Definition of Temperament**

The definition of temperament is: "A person's or animal's nature, especially as it permanently affects their behavior."

The Newfoundland standard states "The Newfoundland is a sweet dispositioned dog that never acts dull or ill- tempered " In the section about the head it says; "Expression is soft and reflects the characteristics of the breed: benevolence, intelligence, and dignity." The final section of the standard entitled Temperament states, "Sweetness of temperament is the hallmark of the breed; this is the most important single characteristic of the breed." Our Illustrated Guide states the following:

*The Newfoundland is typically friendly. Since sweetness of temperament is the most important single characteristic of the breed, shyness, fearfulness, and suspicion are unacceptable traits and should be penalized severely. Chapter 14, Section 8-a of the AKC rules provides for excusal or disqualification for dogs which menace or attack humans. Furthermore, it is not acceptable for a Newfoundland to menace or attack other dogs and any Newfoundland doing so should also be severely penalized.*

Chapter 14, Section 8-a of the AKC rules provides for excusal or disqualification for dogs which menace or attack humans. Furthermore, it is not acceptable for a Newfoundland to menace or attack other dogs and any Newfoundland doing so should also be severely penalized.

Because temperament is so definitive of the breed, judges must pay particular attention to it when evaluating the Newfoundland.

The overall demeanor of a Newfoundland should be one of stability, confidence and friendliness. Their posture and body language should invite your approach. There should be no display of shyness or spookiness. The tail carriage of the Newfoundland can tell you a lot about how the dog is feeling. When the dog is standing relaxed, its tail hangs straight or with a slight curve at the end. When the dog is in motion, its tail is carried out. A tail that is tucked under its body is a sign of apprehension.

We all agree that aggression towards humans is to be guarded against at all cost and can count on judges to follow the AKC rules regarding this to the letter. But in addition, a Newfoundland should never show aggression toward other dogs.

At the Newfoundland Club of America's National Specialty for Best of Breed it is not uncommon to have over 100 specials lined up nose to tail, 2/3rds of which are intact males. While this may not be possible in other breeds it is expected in the Newfoundland. This also applies to females. You can well imagine that at a national specialty there are bound to be girls in season. This should not cause dissention among the boys nor grumpy behavior from the girls.

As judges you decide who gets the win. No matter how much the dog exudes breed type, exemplary temperament is paramount. Please ensure that the nod is given to the dog that most closely matches the physical aspects of the breed standard and epitomizes the sterling Newfoundland character the Newfoundland Club of America strives so hard to maintain.

Submitted by

Newfoundland Club of America Judges Education Committee December 2011

## **EPPC: From Mary Lou Zimmerman**

**Pursuant to the charges from the Board of Directors from December 2011 and January 2012:**

**Proposed Footer to be added to each message on all NCA email lists:**

The Newfoundland Club of America accepts no liability for the content of this email, or for the consequences of any actions taken on the basis of the information provided.

**Amend Electronic Mail Discussion Lists Policy Part III, section C. of the EPPC Policy Manual – approved April 2010.**

The EPPC recommends that the policy be amended to include an additional bullet point to the email list guidelines. This becomes the 3<sup>rd</sup> bullet point:

- Do not post any personal information, including names, addresses or phone numbers. If you want to include your own personal information in a post, that is acceptable, however you do so at your own risk.

*The EPPC recommends that the NCA BOD has it's legal counsel review the full email list guidelines with regard to the conflicting statements that the NCA is absolving itself*

of all liability for the contents of posts in the footer statement, and the addition of content limitations in the mailing list guidelines, which implies some level of ownership of the content. The full list of guidelines can be found here:

<http://www.ncanewfs.org/committees/pdfs/EPPCPolicy/Emaillist.pdf>

The EPPC discussed the charge from the BOD for posting guidelines for social media, including Facebook, but feels that the scope of such guidelines would fall under a separate policy from email discussion list. The committee will be developing this policy over our next 1-2 meetings and will present a social media policy proposal to the board for its approval at the April Board teleconference.

Thanks!  
MLZ

### **Membership Committee:**

Mary Lou Cuddy - Chair

Discussion on creating a way to provide the membership directory in an electronic version for NCA members to be able to download. (i.e. into a gmail account)

### **Breeder's Education Committee:**

Kathy McIver – Chair

*"Roger Frey moved and Lynne Anderson-Powell seconded that the Board refer a request to consider developing a Newfoundland puppy information page on Facebook to the Newf Ambassador Committee and the Breeders Education Committee with reports due back to the Board by the February 2, 2012 Board agenda deadline. Without objection, the motion passed.*

Since the Breeder Education Committee does not know the exact vision for a Facebook Newfoundland puppy information page, our committee assumes it will be a question and answer format. If correct, it is the opinion of this committee that the NCA should not provide a venue for just anyone to be able to post "expert" advice. Our committee is very concerned over the potential for liability. In fact, we think the risk factor far outweighs any possible benefit.

If this page is designed to be an answer spot for people to ask questions about their own puppies or where/how they would find a new one, it is the opinion of this committee that a more personal and individual communication is more effective ( breeder referral and/or the Breeders List).

On the other hand, if this page is designed to merely drive people to the NCA website, our committee is okay with the idea.

Respectfully submitted,  
Breeder Education Committee

## **Working Dog Committee:**

Sue Marino – Chair

Agenda item 1:

These are the general water test regulations with changes due to adding WRDX, updates/clarifications that needed to be made in general and due to the concerns that the board directed the WDC to review.

Agenda item 2:

We also addressed the two draft issues that were sent to us.

The one minute time limit to get a dog moving on the freight haul will now also apply to the maneuvering course.

The dog must enter the harness and hitching area off lead.

These will be communicated to the judges in a judges communication which we will be working on soon.

Agenda item 3:

Last year the board approved a pilot program for clubs to hold a WRD requalification test using the current WRD regs.

Does the board want to continue this program this year? If so, do you want to continue using the current WRD regs?

Last year approximately four clubs took advantage of the requalification test.

***Newfoundland Water Rescue  
Water Dog, Water Rescue Dog & Water  
Rescue Dog Excellent Regulations***

# Newfoundland Club of America Water Tests

## Purpose

The NCA Water Tests are a series of exercises designed to develop and demonstrate the abilities of purebred Newfoundland dogs in an aquatic environment. Historically, the Newfoundland has functioned as a working companion to humans in draft and water rescue work. Members of the breed have participated in many heroic water rescues. NCA water tests are not a competition; rather, they demonstrate natural ability and skills acquired through training, and they emphasize teamwork between dog and handler in simulated work and rescue situations. **The NCA Water Rescue Dog Excellent division furthers that vision by providing multi-task exercises that require advanced training, constant teamwork, and physical stamina. Not all dogs who have earned other water rescue titles will be able to attain this level of expertise. Instead, a Water Rescue Dog Excellent Newfoundland will demonstrate superior natural ability, training, and efficiency in simulated rescue situations. These exercises are designed to test the intelligence, instinct and stamina of the Newfoundland. Due to test conditions and restrictions these exercises cannot be executed as they would be in realistic situations. These exercises simulate real life rescue situations safely within the constraints of the test site.** The ideal working relationship is a balance of controlled performance and natural independence. Dogs should display not only efficiency in accomplishing their tasks, but also willingness and enjoyment in their work.

## Chapter I - General Regulations

### Section 1. Application for Water Tests

A Water Test Committee from a recognized Regional Club of the Newfoundland Club of America (NCA) may apply to the Working Dog Committee (WDC) of the NCA for permission to host a Water Test. Application must be made using an approved WDC application form.

Application forms are available from the Water Test Applications Secretary and the NCA website where toolkits are available in the working dog section. The completed application must be sent to the WDC Water Test Applications Secretary whose name is available on the web site. The application must contain the following information:

1. The names, addresses, telephone numbers, email addresses of the Water Test Chairperson, the Water Test Secretary, and a third Water Test committee member from the test giving club. All must be NCA members.

2. The names of **all judges, as well as the division in which they will judge and** their Judges' Acceptance Forms completed and signed.
3. The written guarantee that steward assistance and all equipment (other than the equipment furnished by each entrant), and other necessary provisions will be available at the test site.
4. The certification that all NCA Water Test regulations will be followed.
5. The date(s) of the Proposed Water Test(s), the test site address, and a description of the site, including a detailed site map **if the site has been used less than 3 times**. The WDC recommends that Water Test dates be coordinated with neighboring Regional Clubs to avoid conflicting dates within 300 miles.
6. The signatures of the Water Test Chairperson, the Water Test Secretary, the third Water Test committee member and a member of the Regional Club's Board of Directors signing on behalf of the Regional Club.

A completed application, which includes judge's acceptance forms, must be mailed to the Water Test Applications Secretary a minimum of four (4) months, but not more than twelve (12) months, prior to the date of the proposed test. The WDC Water Test Applications Secretary usually communicates the WDC's approval or rejection of the Water Test Application to the Water Test Chairperson within forty-five (45) days following the receipt of the completed application. When the Working Dog Committee is considering a Regional Club's application for an NCA Water Test, the committee considers any past violations of the Regulations at its previous tests. An email address must be included if verification of application received is requested.

An application that is received late will be assessed late fees. **Any part** of the test application received up to 5 days after the deadline will be assessed a \$25.00 late fee. Fully completed test applications received 6-30 days late will be assessed a \$50.00 late fee. Test applications received more than 30 days after the deadline will not be approved. Late fees must be paid by the regional club prior to approval of any further working events.

In the event the WDC denies permission for holding the test, the water test committee may appeal to the NCA Board. The Working Dog Committee shall supply the NCA Board their reasons, in writing, for not approving the requested test. The final decision shall be that of the NCA Board.

## **Section 2. Duties of the Water Test Committee**

The water test committee will act as the official representative of the NCA and must enforce these Regulations. Any violations of these Regulations shall be reported in writing and attached to the water test committee's report to the WDC.

The Water Test Committee will prepare a premium list for the water test to distribute to those who request it. It should also be posted on the Regional Club's web site.

**The premium list must include the following information:**

The date(s) and location of the water test(s) with a detailed description of the test site and other features specific to the test site. This must include information regarding water conditions and the distance from shore where the average Newfoundland dog begins swimming.

The judges' names, including the name of any observer judge, if known.

The entry limit, that there will be an alternate list if the entries exceed the limit, and the method for determining alternates as specified in the NCA policy on handling entries, refunds and alternates listed in Section 12 Entry Limitation.

The beginning date for accepting entries, which must be no less than ten (10) days after the premium list has been made available.

The closing date and time for accepting entries.

The levels divisions (WD, WRD, WRDX) being offered at the test and the days and order in which they will be judged.

The approval date of the Water Test Regulations being used at the NCA Water Test.

A statement regarding entrant's responsibility for obtaining the current NCA Water Test Regulations.

The name and address of the WDC Publications Secretary from whom entrants can order the NCA Water Test Regulations and notification that the Regulations are also available on the NCA website as well as any updates made to the regulations.

The name and address of the Water Test Secretary to whom the entries shall be sent.

Entries must be made on an official NCA entry form containing the notice that a copy of the entered dog's AKC, ILP/PAL, or foreign registration paper must be attached.

Additional information such as the following: current officers and directors of the NCA and regional club; awards; accommodations; directions to test; advertising; meals; any special events and additional activities.

**Any event, other than an NCA event, being publicized in a water test premium or catalog must include a statement indicating that the event is not an NCA event.** For example: an ad for an all breed test following the NCA test must clearly state "This is not an NCA event".

Whether or not there will be practice allowed at the site and the times, if allowed.

The Premium List must not be made public before the regional club receives approval from the NCA WDC to conduct the test(s).

After the closing date for entries, the Water Test Secretary will notify each exhibitor, at least ten days before the test, of the following information: water test location (including a map and/or written directions), ~~judging time~~ **schedule**, judges' names, exhibitor number, and any changes in the water test information that **have** occurred since the premium list was sent. If entries exceed the published entry limit, the Water Test Secretary will notify alternates of their position on the alternate list as per the NCA policy on entries, refunds and alternates (**Chapter 1, Section 12**).

The Water Test Secretary will keep a copy of the current NCA Water Test Regulations and Grievance Procedures at the test site for reference.

The Water Test Chairperson will appoint a safety officer. The Safety Officer will be responsible for ensuring that no unentered dogs are permitted in the main testing area at a water test. The Safety Officer will see that all personnel are properly equipped with approved Coast Guard (American or Canadian) flotation devices and are wearing adequate foot protection prior to entering test waters. Each exhibitor is responsible for providing his/her own flotation device as well as proper footwear. **It is optional for beach stewards to wear life jackets.**

The Water Test Chairperson and Water Test Secretary must each submit reports to the designated Working Dog Committee member within thirty (30) days after the test. The Chairperson's report will include a description of the test, a summary of any problems or complaints registered with the Water Test Committee, and other information requested by the WDC (**see the water test time line on the NCA web site**). The Secretary's report will include the judges' report sheets, Entry Forms with AKC registrations, two (2) copies of the premium list, four (4) copies of the marked catalog and any other materials requested by the WDC. Entrant and judges evaluations should not be included. The WDC Water Test Records Secretary will send one copy of the marked catalog to the NCA Database Committee and one to the NCA Historian.

All required reports submitted to the designated Working Dog Committee member must be postmarked within thirty (30) days from the date of the test in order to receive approval for a subsequent test. Completed paperwork that is postmarked 1-5 days late will have the regional club assessed a \$25.00 late fee. Completed ~~event~~ test paperwork

postmarked 6 or more days late will have the regional club assessed a \$50.00 late fee. Late fees must be paid by the regional club prior to approval of any further working event.

### **Section 3. Qualifications of Judges**

Before the Water Test Committee applies for permission to sponsor an NCA Water Test, it must select a judging panel from the list of judges who have met the qualifications approved by the WDC and the NCA Board. A current list is available from the designated Working Dog Committee member who maintains the judges' qualifications records **and on the judge's page of the NCA web site. Criteria for choosing judging panels are also on the judge's page. One or two different judges may be chosen for the WRDX division.** Judges whose names are "flagged" on the judges list cannot accept assignments until they exhibit at a test and will not be approved on a judging panel.

### **Section 4. Dogs Eligible to Compete**

The NCA Water Tests shall be open only to purebred Newfoundland dogs at least six (6) months of age by the date of the test. As used in these regulations, the word "dog" refers to either sex. All entries must have an AKC individual or litter registration number, an ILP/**PAL** number, or a foreign individual or litter registration number.

### **Section 5. Dogs that May Not Compete**

No dog belonging wholly or in part to a Water test judge or to any member of such person's immediate family, including in-laws, can be exhibited under the judge. Lame dogs or dogs that have been taped or bandaged in any way, or have anything attached to them for medical purposes, shall be ineligible to be tested.

### **Section 6. Test Disqualifications and Ineligibility**

Judges must immediately disqualify and remove the following from further competition:

Any dog which its handler cannot control.

Any dog which attacks a person or dog on test grounds.

Any handler who deliberately interferes with another handler or dog.

**Any dog that leaves test area while being tested including after last exercise.**

Any handler who behaves in an unsportsmanlike manner in or outside the testing area. (Unsportsmanlike behavior includes, but is not limited to, the following: directing angry or abusive language at a person or dog, mistreating a dog, showing discourtesies to judges, test officials, stewards or others.)

The judges will mark the dog disqualified and state the reason on the official judges' **record** form. The Water Test Secretary will also note the disqualification in the test report to the WDC.

The Working Dog Committee and the NCA have adopted the AKC official policy concerning dog attacks that lead to an injury, either to a person or to another dog. Also, Water Test judges may excuse, and even ask to have removed from a test site, if necessary, any dog that appears dangerous to other dogs or persons. Actual reports of dog attacks causing injury to either a dog or a person would go directly through the grievance process. The grievance may be filed by the person injured, the person whose dog was injured, or any witness to an attack causing injury. The dog in question ~~should~~ **must** be removed from the test site and cannot be entered in any subsequent NCA working event pending the completion of the grievance hearing process through the WDC, with subsequent action by the Board. Any test the dog is entered in already, **in which entries have closed**, would have to be forfeited with the dog in question banned from the test site pending completion of the grievance process. The recommendation of the WDC will be sent to the Board following the grievance hearing, which would end the WDC jurisdiction. The Board will need to form a committee whose purpose it is to deal with reinstatement requests after the Board has denied further exhibition privileges for any Newfoundland.

AKC Rules Applying to Dog Shows: Chapter 11, Section 15- Any dog, that in the opinion of the Event Committee, attacks a person or dog at an AKC event, resulting in an injury, and is believed by that Event Committee to present a hazard to persons or other dogs, shall be disqualified by the Event Committee pursuant to this section, a report shall be filed with the Executive Secretary of The American Kennel Club. The disqualified dog may not again compete at any AKC event nor be on the grounds of an AKC event unless and until, following application for reinstatement by the owner to the American Kennel Club, the owner receives official notification in writing from the AKC that the dog's eligibility has been reinstated.

### **Section 7. Handling a Dog/ **Substitutions/Handicapped provisions****

Each dog must be handled by the same handler for all exercises. Handlers may be substituted after the test closes but the test secretary must be informed of the change before the test begins.

**Special provisions may be allowed for handicapped handlers, if at all possible, as long as they do not interfere with the dog and are pre-approved by the judges.**

### **Section 8. Bitches in Season**

Bitches in season may participate in NCA Water Tests. Bitches in season will be kept out of the test area and away from all other dogs until called for by the judges. They may perform the Basic Control Exercise after all other dogs have been judged on that

exercise if the Basic Control ring is not close to the test area otherwise they must wait until all of the other entrants have been judged in the water before doing Basic Control. At least one other "volunteer" female will perform the One Minute Down with the bitch in season.

Bitches in season shall be judged on the water exercises at the conclusion of judging for that day. When Junior, and Senior and Excellent Division entries are judged on the same day, any Junior Division bitches in season shall be judged after other regular judging for both all divisions has been completed, including post entries. followed by the Senior Division Bitches in season will be judged in the order that their divisions were judged earlier in the day. This applies to two (2) day tests which are held back to back as well. For two (2) day tests where the Junior Division entries are judged on one day and the Senior Division entries on another, any Junior Division bitches in season will be judged at the conclusion of the Junior judging and any Senior Division bitches in season will be judged at the conclusion of the Senior Division judging. If a club holds a test for only one division on one day then the bitches in season in that division will be tested at the end of that day.

### **Section 9. Unentered Dogs**

The appointed Safety Officer is responsible for insuring that all unentered dogs are kept outside and away from the designated test area.

### **Section 10. Entering at Own Risk**

Entrants participate in an NCA Water Test at their own risk. Entrants agree to abide by the NCA Water Test Regulations and the Constitution and By-laws of the NCA.

### **Section 11. Judges' Decisions**

At the Water test, the decisions of the judges are final in all matters affecting the scoring and working ability of the dogs and their handlers. The judges are in sole charge of the Water Test area until their assignment is complete. A dog must be marked passing on every exercise by both judges in order to qualify for a WD, or a WRD or a WRDX title.

### **Section 12. Entry Limitation**

Once test approval is received from the NCA Working Dog Committee, the Water Test Committee can determine the date it will accept entries, and the date will be published in the premium list. This date must be at least ten (10) days after the premium list is made public.

Maximum entries to be judged are thirty (30) dogs per test day. If a water test committee anticipates an entry in excess of its facilities for a water test, it may limit entries to less than thirty (30). In setting entry limits, a test committee should consider that, on the average, judges can usually judge five (5) Junior Division entries per hour,

and three (3) Senior Division entries per hour and two (2) Excellent Division entries per hour. Test Committees may also decide on a minimum number of entries to hold the test as long as it is published in the premium list.

A prominent announcement of such limits must appear on the title or cover page of the Water test premium list. Priority will be given to entries that have not earned titles in the division entered. Titled dogs may be entered for judging (requalification) if entry limits have not been filled, and the entry form must state that the entry is for requalification. Under no circumstances can the published entry limit be changed.

Entries will be accepted by mail only and must show a **visible** postmark.

### **Accepting Entries:**

Test premiums will list an opening and closing date for entries. The opening date is the earliest date an entry can be sent as indicated by the postmark of the entry; the closing date is the last day an entry can be received by the test secretary and is unrelated to the postmark. The test will not close officially until the published closing date **and time**, even if the entries exceed the limit before the closing date.

No dog will be allowed to ~~enter~~ test in more than one division, **in which they have not already earned a title**, in a test or on the same day, with the exception of post entries. **A handler entering a dog in the WRDX division, at a test where WRDX entries are limited, may also enter as a WRD requal. If the dog does not get into the WRDX test at closing the handler must decide whether to stay on the alternate list for WRDX and pull their WRD entry or pull from the WRDX alternate list and test as a WRD requal. The dog may only be entered in one division after closing. The handler must include a note to the test secretary explaining their intention to pull one entry at closing.**

Do not assign final entries until **after** the closing date. This will accommodate entries that arrive on different dates but that have identical postmarks. Open all envelopes before assigning entries, because some envelopes may contain more than one entry and some may be entering only one day of a two-day test weekend.

When the test closes, if the entries exceed the maximum limit, follow the procedure listed below. If a lottery is required as specified below, a separate lottery **MUST** be held for each of the two days of a two-day test weekend. (Note: An efficient and unbiased way to do a lottery is to number each entry and put the corresponding numbers on small, individual pieces of paper. Randomly select the papers to determine the status of each entry.) There must always be at least two people present to witness the lottery, at least one of which is not entered in the test.

### **Assigning Entries:**

1. Assign a spot in the test to each entry postmarked with the first allowed entry date; assign a spot in the test to each entry postmarked with the second allowed entry date; continue as above until all spots in the test are full.
2. If at any time there are more entries with identical postmarks than spots available

in the test, conduct a lottery to determine which entries are accepted into the test. Those not assigned spots become alternates.

Example 1: If the entries received with the first allowed postmark exceed the test limit on the closing date, conduct a lottery with all of the entries with that postmark. Those not chosen become alternates. Continue to do a lottery for each postmarked date to determine the order of the alternate list.

Example 2: There are openings in the test for entries postmarked with the first and second allowed date. Five entries are postmarked with the third allowed date and there are two openings left. Conduct a lottery with those five entries—two will be entered in the test and three will become alternates as will any entries with later postmarks.

Example 3: If the limit is 25, and there are 30 entries with the first postmark, the first 25 randomly selected in the lottery will be assigned spots in the test and the remaining entries will be pulled as first alternate, second alternate, third alternate, etc. Assign other entries with later postmarks as alternates in the same way doing a lottery for each postmarked date.

**3.** Add requalification entries to the alternate list after all untitled dogs on the list. Requalification entries should be added by postmark and by lottery, as necessary. **If the test is not full requalifiers should be assigned a number in the order in which their entry was received. Requalifiers do not have to be placed after dogs without titles unless the test is full.**

### **Withdrawing Entries and Refunds:**

To withdraw an entry, the entrant must notify the test secretary by telephone, email, or U.S. mail. The secretary must confirm receipt of such notifications. The entrant will receive a full refund of the entry fee if the notification is received prior to the closing date **and time** for entries. After the closing date has passed, **test committees are not required to give refunds, though they may chose to do so.**

### **Alternates and Refunds:**

If an entrant submits an entry to a water test but is not assigned a place in the test, the test secretary must notify the entrant immediately after the closing date and give the entrant the option to be placed on the alternate list. If the entrant **chooses** not to be on the alternate list, **they** will receive a full refund. If the entrant chooses to stay on the alternate list **but later** pulls their entry after the test closing date, they will not receive a refund. **Entrants placed on an alternate list will receive a full refund if they do not get into the test on test day.**

Should an entrant have two dogs entered and one dog is on the alternate list, the **entrant cannot substitute the alternate entry for the regular entry.** If the entrant must pull the entered dog, then the first dog on the alternate list will fill the opening.

### **Changing Entries:**

Once the closing date listed in the premium has passed, if an entrant notifies the secretary that they are withdrawing their entry or have passed at a previous test, all entrants on the alternate list must be notified that their ranks have changed.

Example: If a test limit is 25 dogs and 25 dogs are tested, but none of the five dogs that were on an alternate list were tested, the five alternates would receive refunds after the test. If 20 original dogs and three alternates were tested, but two alternates did not attend the test, the handlers of those two alternates would not receive refunds because had they attended, they would have been tested.

If an entrant has been assigned a spot in the test but their dog passes at a previous test, the handler must notify the test secretary by 6 pm the night before the test as to whether they will move their entry to another division (i.e., WD to WRD or WRD to WRDX), withdraw from the test, or requalify in the same division if the test is not full. If the test is full they have the option of being moved to the end of the alternate list to requalify. ~~This overrides Section 4,4.B, of the current water test rules.~~

### **Section 13. Entry in Junior Division**

Entry in Junior Division is open to dogs with the following stipulations:

Any eligible dog that has not yet earned a WD title may enter the Junior Division.

Any dog that has earned a WD may enter as a requalifying WD. However, if the dog ~~passes~~ **requalifies in** the Junior Division, the dog may not be post entered in Senior Division at the same test. Any entry for requalification will be accepted only if the limit for the test (overall limit or division limit, as listed in the premium list) is not exceeded.

Any dog that has earned a WRD **or WRDX** may enter as a requalifying WD. If the dog ~~passes~~ **requalifies in the** Junior Division, the dog may not be post entered in Senior Division at the same test.

If a dog earns its WD after the closing date of a subsequent test in which it is entered, the handler may choose to requalify the dog in the Junior Division at the future test if these conditions exist: A.) There are no untitled alternates waiting to fill the dog's space, and B.) The entry as a requalifier will not exceed the maximum entry limit of the Junior Division, if a limit is stated in the premium list.

### **Section 14. Entry in Senior Division**

**Entry in Senior Division is open to dogs with the following stipulations:**

Only dogs which have passed the Junior Division shall be eligible to be tested in the Senior Division.

If a dog entered in the Junior Division has passed a Junior Division test after the closing date for entries, the entry may be transferred from the Junior to the

Senior Division. To transfer the entry from Junior to Senior Division, the handler must submit to the Water Test Secretary a signed statement listing the name of the dog, the date and location of the Water Test passed, the judges' names, and the name and address of the owners. A change of entry from Junior to Senior must be received by 6:00 pm. the night before the test.

A dog that has earned a WRD or WRDX may enter as a requalifying WRD. Any entry for requalification will be accepted only if the limit for the test (overall limit or division limit, as listed in the premium list) is not exceeded.

Dogs which successfully fulfill the requirements for a Water Dog title at a test may be post-entered in the Senior Division at that test and will be tested at the conclusion of Senior Division judging. There will be an additional entry fee. The handler will be allowed to test his dog only until it fails an exercise.

## **Section 15. Entry in Excellent Division**

Entry in Excellent Division is open to dogs with the following stipulations:

Only Dogs which have passed the Senior Division shall be eligible to be tested in the Excellent Division.

If a dog entered in the Senior Division has passed a Senior Division test after the closing date for entries, the entry may be transferred from the Senior to the Excellent Division, as long as the Excellent Division is being offered at the test and the entry limit for that division has not been filled. To transfer the entry from Senior to Excellent Division, the handler must submit to the Water Test Secretary a signed statement listing the name of the dog, the date and location of the Water Test passed, the judges' names, and the name and address of the owners. A change of entry from Senior to Excellent must be received by 6:00 pm. the night before the test.

A dog that has earned a WRDX title may enter as a requalifier in WRDX. Any entry for requalification will be accepted only if the limit for the test (overall limit or division limit, as listed in the premium list) is not exceeded.

A dog earning his WRD title during a water test is not permitted to post enter to the WRDX Division being held on the same day due to time constraints.

Entrants passing WRD may change their entry to WRDX at future tests in which they had entered the WRD division as long as the division has not filled any posted limit.

WRDX dogs may be tested as part of a WD/WRD/WRDX water test or a WRDX test may be held as a stand alone event. Judges for the WRDX Division of any water test must meet the criteria listed on the NCA web site.

## **Section 16. Requalifications as Multiple Division Entries**

Multiple Division requalifications will be allowed at NCA Water Tests for already titled dogs. Dogs may be entered in more than one division on the same day but only if they have already qualified, at previous tests, in all of the divisions entered. Each entry must be sent on a separate entry form. If the entry for the test exceeds its limit and a lottery is necessary the dog may not get into each division entered. There will be no substitutions for dogs to change divisions if their entry is chosen for one division but not the other in a lottery. Judges must excuse any dog not in condition to finish the division entered and, if so, the dog will not be able to continue in any other division entered that day. Entry fees will not be refunded for dogs that are excused. Entrants are discouraged from pushing their dogs beyond their limits.

## **Section 17. Qualifying Performance & Awards**

For a dog to receive a qualifying performance, both judges must mark the dog with a passing performance for each exercise in the division entered. A dog receiving a qualifying performance in Junior Division is entitled to use the title "Water Dog" in any Newfoundland Club of America activity. "WD" is the abbreviation for the Water Dog title. A dog receiving a qualifying performance in the Senior Division is entitled to use the title "Water Rescue Dog" in any activity. "WRD" is the abbreviation for the Water Rescue Dog title. **A dog receiving a qualifying performance in the Excellent Division is entitled to use the title "Water Rescue Dog Excellent" in any activity. "WRDX" is the abbreviation for the Water Rescue Dog Excellent title.** A dog requalifying **at in any level division** can add the number of times they have requalified after the title such as WD1 for a dog that has earned a WD and requalified **at in the junior-level division** once, or a WRD3 for a dog that has earned a WRD title and requalified **at in the senior level-division** three times.

## **Section 18. Changes of Judges, Water Test Officials, or Site**

If a Water Test Committee is informed at any time prior to the opening of its water test that an advertised judge cannot fulfill his/her engagement to judge, the Water Test Committee will substitute a judge from the NCA WDC Approved Judges List. The designated NCA Working Dog Committee member (who processed the water test application) or the WDC Chairperson (in case the designated person cannot be reached) must be notified to approve the substitution. This may be done by phone, mail or electronic means; however, if the request is made by phone, a follow-up letter must be sent to the designated NCA Working Dog Committee member (who processed the water test application) with a full explanation. The designated member must notify the other WDC members of the change and the reason for the request. If time permits, a written notice should be mailed to the exhibitors.

In the unlikely event that a judge becomes ill or is unable to fulfill the judging assignment on the day of a test or during a test, and the designated WDC member or Chairperson cannot be reached according to the procedures described above, the test committee may substitute an Approved Water Test Judge who is in attendance at the test to fulfill the assignment. If an approved judge is not available, a qualified person

with considerable water test training and exhibiting experience (See Chapter Two, Section 1, paragraph 2 on Qualifications of Judges) may be appointed by the Test Committee to fulfill the assignment. The designated WDC member or Chairperson must be notified of the substitution as soon as possible, and a full explanation for the substitution, including the qualifications of the substitute judge, must be included in the test chairperson's report.

Prior to the start of the test or substitute judging assignment, ~~the change must be posted~~ **exhibitors must be notified**. Exhibitors have the right to withdraw their entry if they choose not to exhibit under the substitute judge, and their entry fee will be refunded.

In the event a site must be changed, the Water Test Committee should make every effort to secure a suitable site within twenty-five miles of the original site.

If, because of natural disasters, civil disturbances, or other acts beyond the control of the test-giving club, it is impossible to start or complete the test, no refund of entry fees will be made.

## **Section 19. Stewards**

Stewards assist the judges, and ~~they~~ may act only on the judges' instructions. Stewards will not give information or instructions to owners and entrants except as specifically instructed by a judge, and then only in such a manner that it is clear that the instructions are those of the judge. Exhibitors are not permitted to give instructions to the stewards. Any harassment of stewards must be reported immediately to the judges.

Care must be exercised to ensure the calling steward(s), **in all divisions**, are not overly familiar with a dog being tested. Examples include, but are not limited to, the following:

- ⤴ The steward(s) has cared for the dog within the past six months.
- ⤴ Calling stewards may be part of the same training groups of handlers and dogs in a given summer. However, calling stewards must avoid direct contact with the dogs they will call for at tests in that summer training season. It is therefore recommended that clubs intending to host Water Tests should consider appointing their calling stewards as early in the season as possible to avoid potential conflicts.
- ⤴ The steward(s) has trained the dog for obedience, conformation, or working events.
- ⤴ In no case should a member of the owner's or handler's immediate family steward exercises for their own dog, a dog they co-own, or for one with which they are overly familiar.

- ⤴ For consistency in the test, calling steward(s) should be prepared to steward for the entire test. Changes of stewards should be limited to substitution for a steward that is ill or in distress.

There is a WRDX steward handbook available on the NCA web site which gives more detail and will help stewards better understand their job for this division.

## **Section 20. Test Site Conditions**

The ring for the Basic Control exercise must be enclosed by ropes, baby gates, etc, be rectangular and should be at least forty by fifty feet (40' x 50'). The area designated for water testing shall be sectioned off in some way. The usable waterfront must be a minimum of seventy-five (75) feet, **however, for a WRDX test the water markers must be 100 feet apart in the water.** The water should extend at least 200 feet from the shore. The testing area should have a gradual drop off and must permit the dogs to be swimming within twenty (20) feet of shore. If water depths change due to unforeseen circumstances, after the site has been approved, the required distances for an exercise will be increased up to twenty (20) feet, as needed, so that the dogs will be swimming as prescribed in the exercises. Markers will be moved to reflect the change in distances. If time permits, exhibitors will be notified of the change of distances in advance. Water must be free of unmarked hazardous objects. There must be an area suitable for the underwater retrieve.

There must be a shaded area provided for entered dogs to be crated or confined when they are not being tested.

## **Section 21. Spectators**

Since Newfoundlands working under natural conditions may be in places where there are extraneous sounds, spectators are encouraged to applaud and cheer for performing dogs as they return to shore with the article or rescue victim. However, spectators must not interfere with the performance in any way. Judges may use their discretion to determine what constitutes interference.

## **Section 22. Emergency Provisions**

The Water Test Committee should take all reasonable precautions to ensure the safety of all involved. There must be a telephone available at the test site. It is recommended that the services of a veterinarian be available during the water test. The veterinarian may be "on call" if services are available within a short distance of the test site; otherwise, the veterinarian must be on site. Information regarding after hours emergency care for dogs and people should be available to entrants and committee members. A first-aid kit is required, and a backboard is recommended.

## **Section 23. Personal Flotation Devices**

It is mandatory that any person entering the test water or embarking on a water craft must wear an approved Coast Guard (American or Canadian) flotation device, in good condition, and some form of secure foot protection, “croc” are not permitted. **as well as suitable foot protection that can be worn in the water and stays secure to the foot.**

The Water Test Committee is responsible for equipping their stewards and personnel with these devices. The safety officer is responsible for ensuring the compliance with the above regulations. The judges shall mark any exhibitor who refuses to comply with these regulations "excused" from further testing.

### **Section 24. Canceling a Test**

If a Water test is canceled due to insufficient entries the WDC Water Test applications person must be notified immediately.

### **Section 25. Entry of Other Breeds**

Test committees may accept the entries of breeds other than Newfoundlands to be judged after their test under the following conditions: The test must not be full, the judges and committee must agree to accept the entry, the entry will not be judged until after all Newfoundlands have been judged and the Newfoundland test is considered finished including bitches in heat season, there must be a “volunteer” dog to participate in the long down if the other breed is to be judged in basic control since it is considered a group exercise.

## **Chapter II - Regulations for Performance and Judging**

### **Section 1. Standardized Judging and Qualifications of Judges**

Standardized judging is of great importance. There shall be two judges for **each Division of an NCA Water Test. The WRDX Division may have a different judging panel than the rest of the test.** It is recognized that the water tests are intended for performance on natural bodies of water and beaches and may require minimal adaptation to fit the site available. In no case, however, are judges to add, delete, or change from the requirements of the water tests. Judges must act in a professional, impartial, and pleasant manner in accordance with the NCA Judges Code of Ethics.

Judges selected by a Water Test Committee for a water test should be chosen for their ability to judge Newfoundland dogs working in the water. Judges should possess thorough knowledge of the water test rules, a sense of fairness, and consideration for the efforts of dogs and handlers. The NCA designated Working Dog Committee member maintains a copy of the Qualifications for Water Test Judges and a current list of approved judges, which **is are** also available on the NCA web site.

## **Section 2. Failed Exercises and Re-judging**

During the **WD/WRD** Water test, judges may permit a handler one try to assist his dog in completing a failed exercise. Only gentle guidance by the dog's collar is permitted as discipline. **During the WRDX Division once a dog has failed an exercise they must move on to the next exercise immediately.**

If a dog has failed a particular exercise, it shall not ordinarily be re-judged. However, if the dog's performance was prejudiced by peculiar or unusual circumstances, the judges may, at their discretion, re-judge the dog on the entire exercise, but not a portion thereof. If the judges rejudge a dog on an exercise, they should explain the reason on the Judges' Record Form. The reason for the rejudging should be announced to the spectators. Exhibitors should not be failed for personal ideas that are not within the regulations.

## **Section 3. Dog or Person in Distress**

If at any time during a Water test, it becomes apparent to either the handler or the judges that a dog or person is in distress, the exercise shall be immediately terminated. If the judges determine that the cause of the distress was due to an unusual circumstance, they may permit the dog or handler a reasonable period to recover before resuming testing. The dog and handler will be re-judged on the entire exercise, not a portion thereof. If the dog or person has not recovered sufficiently to continue testing within a reasonable time, the judges shall mark the dog failed. If in the judges' opinion a handler is not showing reasonable consideration for the dog's welfare, it is within the judges' discretion to terminate the exercise and to mark the dog as failed.

## **Section 4. Judges' Record Forms**

The judges will record the pass or fail performances of each dog on the Judges' Record Forms following the conclusion of the test. Any significant comments on the judges' score sheets must be transferred to the Judges' Record Forms. Score sheets should be made available to the exhibitors at the conclusion of the test, unless the judges wish to maintain copies as a personal record. In that case, the Water test secretary must make copies to send to the exhibitors following the test.

## **Section 5. Entrant's and Judge's Evaluations**

The Water Test Committee will provide each entrant and judge with a Test Evaluation Form. These forms should be completed and mailed within ten (10) days to the Working Dog Committee member in charge of Water test evaluations whose name and address appears on the form and on the NCA web site. ~~These evaluations may also be filled out electronically on the NCA web site under the Water Test page of the Working Dog section.~~ If it is a two day test with the same site and judges, entrants will only have to complete one evaluation. If the two day test has different sites or at least one different judge then entrants should complete two evaluations, one for each day. The WDC

compiles information from these evaluations to send anonymous feedback to judges and test committees. Please remember to complete these evaluations they are very important.

## **Section 6. Catalog Order**

Handlers and dogs must exhibit in catalog order unless otherwise allowed by the judges. Catalog order will be determined by the order in which the entries are received by the Test Secretary. A handler with more than one dog may request that his entries not be judged consecutively. Bitches in season are judged as stated in the Chapter 1, Section 8, "Bitches in Season". It is the responsibility of each handler to be ready since judges are not required to wait for an entrant. If no arrangements have been made in advance, judges may mark absent and refuse to judge any dog or team that is not ready to be judged in catalog order.

## **Section 7. Use of Leash/Harness**

All dogs at an NCA Water test are tested off leash. All dogs must be held on leash or securely crated unless being tested. At the end of their testing dog's must leave the beach area leashed and under control. **If a dog does not leave the beach area leashed and under control after passing the test, the dog will fail. In the WRDX Division use of a safety harness for the dog is permitted (as long as it is not a flotation device of any kind).**

## **Section 8. Required Equipment**

All equipment to be used by the handlers at a Water test, including that provided by the test committee, shall be thoroughly inspected by the judges for suitability. Individual equipment will be checked on the day of testing prior to the start of each division. Once inspected, substitutions are not permitted without the judges' approval.

The handlers at a water test will provide a leash and collar. A dog entered in the water test must wear a well-fitted plain buckle, slip, or snap-around collar while on the test grounds. Fancy collars, prong training collars, halter collars or collars that are improperly fitted, are not permitted. There shall not be anything hanging from the collar.

Standardized equipment, including bumpers, boat cushions, life jackets, life rings, and paddles, may not be altered from their original state, except that the cushion or vest straps may be tied or stitched, ~~not taped~~, in place for safety reasons, and the boat bumper may have a short line attached to facilitate throwing **and the paddle may be painted. Unaltered means that no stuffing or layers of foam may be removed from the article and no articles may be taped, with the exception of the underwater retrieve article. Remember that over use of an article may alter its state so that it is not in the condition to do the job it was originally intended to do. The overall physical appearance of the articles should be as they were purchased from the store, and should meet the intent of the Regulations for their use as close as possible. Scuffing and teeth marks are**

not considered an alteration. The coast guard approved symbol must still be visible on all articles requiring coast guard approval.

Handlers will provide their own equipment for use during the test. However, they may share a set of equipment during testing, as long as the equipment is presented to the judges during the equipment check.

## **JUNIOR DIVISION EQUIPMENT**

A buoyant boat bumper, canvas or plastic. Fire hose material is acceptable but may not contain squeakers.

An eight (8) foot floating line with plastic or canvas boat bumper attached. **The end opposite the bumper may have a small, simple knot or loop.**

A floating line (may be knotted at one end), minimum length of seventy-five (75) feet.

An approved Coast Guard (American or Canadian) boat cushion and an approved Coast Guard (American or Canadian) life jacket (loose straps may be tied or stitched). **Life jackets must be adult or child size, not infant.**

**In addition, each exhibitor is responsible for providing his/her own approved Coast Guard (American or Canadian) flotation device, as well as suitable foot protection that can be worn in the water and stays secure to the foot.**

## **SENIOR DIVISION EQUIPMENT**

Canoe or raft paddle of wood or plastic, at least two and one half (2 1/2) feet in length. A slight variance of ~~1/4 to 1/2~~ **up to two (2) inches** is allowed **but there is no maximum length. Paddle may be painted but not textured or taped.**

An eight (8) foot floating line with plastic or canvas boat bumper attached. **The end opposite the bumper may have a small, simple knot or loop.**

An approved Coast Guard (American or Canadian) boat cushion and an approved Coast Guard (American or Canadian) life jacket (loose straps may be tied or stitched). **Life jackets must be adult or child size, not infant.**

A ring-type life preserver, minimum diameter of twenty (20) inches, (American or Canadian Coast Guard approved or made to Coast Guard specifications) with a

three (3) to five (5) foot line attached. The line may be knotted at the end to facilitate carrying.

An underwater retrieve article that is no more than twelve (12) inches long and four (4) inches tall. When submerged, it should extend no more than four (4) inches from the bottom and should be weighted evenly so that it will sink immediately. The underwater retrieve article may be painted or taped to increase its visibility. **Handers may provide a second underwater retrieve article but it must be identical to the first article except in color. It may be used if the first article is lost in the water but if a second article is used then the dog must retrieve the second article.**

In addition, each exhibitor is responsible for providing his/her own approved Coast Guard (American or Canadian) flotation device, as well as suitable foot protection that can be worn in the water **and stays secure to the foot.**

## **EXCELLENT DIVISION EQUIPMENT**

**An eight (8) foot floating line with plastic or canvas boat bumper attached to one end.**

**A one hundred and twenty five (125) foot floating line that is knotted at one end.**

**In addition, each exhibitor is responsible for providing his/her own approved Coast Guard (American or Canadian) flotation device, as well as suitable foot protection that can be worn in the water and stays secure to the foot.**

## **WATER TEST COMMITTEE**

The Water Test Committee will provide all of the equipment necessary to run a Water test. This includes the following equipment:

**An approved Coast Guard (American or Canadian) flotation device for all water and boat stewards. It is optional for beach stewards to wear life jackets.**

**A rowboat rated for three (3) or more persons with a non-slip surfaced platform securely mounted on the stern to permit a dog to safely enter and exit the boat without contacting the gunwales. The platform should be large enough for the handler and dog to maneuver into position and ride together on it.**

**Rope, tape, fencing, or appropriate material to mark off basic control and the test area.**

Two (2) sets of three (3) floating markers. These markers will be placed at 30', 50', and 75' from shore on each side of the water testing area for WD/WRD and 75', 100' and 150' from shore for WRDX. They should be unobtrusive, visible to the entrants but unattractive to the dogs.

Shore markers. Three shore markers spaced thirty (30) feet apart **for WRD and thirty five (35) feet apart for WRDX**. These will be of such a height and color as to allow the stewards for the Senior Division Life Ring exercise to maintain their positions in the water. **It is strongly recommended that the 3 flags have identical poles placed behind them for the stewards to use to line up and better hold their position.**

- Exhibitor numbers
- Two (2) whistles for judges.
- Two clipboards for judge.
- Stopwatch.
- First aid kit.
- Backboard-recommended.
- A canoe or kayak to be used for the placement of the articles in the Junior Drop Retrieve, Senior Double Retrieve Exercises.
- Cellular phone

**For the WRDX Division only:**

**Appropriate hand and arm protection for the steward in the Unconscious Victim exercise. The protection should include heavyweight neoprene dry suit (OMS 5MM) "exposure protection" diving gloves for both hands, extending up towards the elbows. Uniform, heavyweight hand/arm protection may be obtained from diving shops or from websites, such as [www.leisurepro.com](http://www.leisurepro.com). Wearing of a full wet suit is required for the Unconscious Victim exercise, weather permitting. This requirement may be waived by the judges should the weather be too hot for this to be feasible.**

**An inflatable raft, rated for 4 or more persons for use in the Capsized Raft exercise. The shape of the inflatable boat must allow the shore side of the raft to be flush with the surface of the water as required for the exercise. No "bowing" should occur. There must be no lines hanging from the raft.**

**An anchor system that will allow the rowboat to be held in one place by anchor at the 75 foot mark and the 150 foot mark. Such a system will require ease in**

mooring and unmooring as indicated and defined in each exercise. Plans for a suggested anchor system are in the WRDX handbook available on the NCA web site.

Prior to the beginning of the Water Test, the judges will inspect and approve or disapprove all of the equipment provided by the Water Test Committee. The equipment must be suitable for the test site.

## **Section 9. Commands, Signals and Encouragement**

Handlers' commands to their dogs may be given by voice, arm signal, and/or **voice produced** whistle. The use of multiple commands and signals is permitted except in ~~those Basic Control Exercises~~ where they are specifically prohibited. When one command only is specified for an exercise, it may be a voice, hand, or simultaneous voice and hand command. Handlers may not assist dogs by marking objects to be retrieved by any method other than voice, arm signal, and/or **voice produced** whistle. While an entrant may encourage the dog in a pleasant, upbeat manner, undue or harsh yelling, shouting, or reprimands should be considered undesirable and unnecessary for a dog under control. Such behavior constitutes a failure of the exercise.

## **Section 10. Praise**

Physical praise and petting of the dogs are allowed between and after each exercise. **In the WRDX Division praise is limited to open handed touching of the dog, not the collar, one hand at a time. There can be no restraint, correcting, guiding or physically directing the dog by the hand or collar.** A handler shall not carry or offer food during the exercises, **pre-swim** or in the testing area.

## **Section 11. Handling Between Exercises**

In **the Junior and Senior Divisions**, dogs may be guided gently by the collar and physically praised between exercises. **Handlers may GENTLY push the dog into a sit.** The use of physical guidance other than that specifically allowed, either during an exercise or between exercises will result in the failure of the team. **WRDX Division dogs may only be controlled verbally while being tested. Handlers may not touch the collar. The handlers will otherwise have their hands off the dogs, both on the boats, as well as on the beach except for brief petting between exercises are described in Section 10. The handler may not physically assist the dog at any time during the test.**

## **Section 12. Pretest Swim and Training on the Grounds**

All dogs may participate in a pre-swim, except for bitches in season, which will be given a pre-swim just prior to their judging. The pre-swim is a fifteen (15) minute session prior to the start of judging during which the dogs and handlers may familiarize themselves with the test waters. **The purpose of this period is familiarization only and is not intended for last-minute training.** No food may be carried or offered. During the

Junior Division pre-swim, handlers may use only one retrieving article. No other equipment may be used. During the Senior and Excellent Division pre-swims, dogs are permitted to get on and off the beached boat in addition to the use of only one retrieving article.

Junior Division dogs will be provided a fifteen (15) minute swim period preceding the beginning of the Junior Division judging. Senior Division dogs will be provided a fifteen (15) minute swim period preceding the beginning of the Senior Division judging. Excellent Division dogs will be provided a fifteen (15) minute swim period preceding the beginning of the Excellent Division judging.

Any physical abuse or harsh training of the dog while on test grounds will result in excusing the dog and handler from the test.

During judging, the judges may terminate an exercise once a dog has failed. In the WD/WRD Division if the judging schedule permits, they may allow one try for a handler to assist a dog in completing the exercise that has been failed by taking it gently by the collar. Judges will ask the stewards (if applicable) to move in closer as well.

### **Section 13. Interference and Double Handling**

A judge who is aware of any assistance, interference, or attempts to control a dog from outside the test area, must act promptly to stop any double handling or interference. If, in a judge's opinion, the circumstances warrant, he shall mark the dog failed for the exercise during which the aid was received.

### **Section 14. Complaints and Discipline**

Complaints against judges, exhibitors, or members of the test-giving committee will be dealt with according to the NCA Working Dog Committee Grievance Policy. The Test Committee is required to have copies of the Grievance Procedure with the approved forms at the Water Test. Any person attending a water test may obtain a copy of the NCA WDC Grievance Procedure and forms from the Water Test Chairperson Secretary. All complaints must be filed with the Test Chair within thirty (30) minutes of the end of the test. The WDC and the NCA Grievance Policies are also available on the NCA web site.

### **Section 15. Qualifying and non Qualifying Performance**

Dogs are to be judged on their performance of the assigned tasks. A dog that completes an exercise within the prescribed time limit, and in accordance with the Standards of Performance for that exercise, should be scored as passed. A dog that exceeds the suggested time limit for the exercise but has continued to work throughout the exercise will pass.

Each judge shall independently indicate that a dog has passed or failed upon completion of each exercise. The following whistle signals are recommended:

One short blast... Pass

One long trill... Fail

Three short blasts... judge wants your attention.

### **Section 16. Comfort Break (WRDX Only)**

A dog will not fail who relieves himself on the beach or in the water. Because of the amount of water that might be taken in by a dog working at the WRDX division the judges will permit one "comfort break" at any time during testing, should it be requested by the handler. The handler will request the leash and take the dog just outside the testing area where it will be allowed a very brief period of time in which to relieve itself. Once back in the test area the handler will remove the leash and hand it to a steward. Handlers may not touch their dogs beyond what is required to attach and remove the leash and a brief pat of praise.

### **Section 17. Wading Depth (WRDX Only)**

Prior to each WRDX dog being tested (either during the preswim or before starting the first exercise), the judges will observe the dog and handler in the water to determine an appropriate depth for each handler to wade into for the rescue exercises and will inform the handler of this depth (just above knee, just below hip, etc). The dog and stewards will be met by the handler **prior** to the dog reaching wading depth for the Unconscious Victim exercise and at wading depth for the other rescues. This will be for the comfort of the stewards, since the towing angle by the dog changes dramatically once the dog reaches standing depth. It is recognized that the distance into the water may be different for each handler, depending on their dogs height and the test site.

### **Section 18. Failures common to all exercises:**

1. A dog is not under the handler's control.
2. The dog leaves the test area while being tested except where permitted in the water exercises. **The dog is then disqualified and will not continue.**
3. The handler enters the water except as allowed in a specific exercise.
4. The dog fails to complete the exercise within the required time, unless additional time is granted by the judges for an unusual situation or the dog has continued to work the entire time. (See Section ~~20 46~~-Suggested Time Limits)

5. The handler physically guides or controls the dog after the exercise begins.
6. The dog leaves the water before completing an exercise except as allowed in a specific exercise.
7. A handler abuses the dog or fails to show consideration for the dog's welfare.
8. The dog fails if he/she does not wait for the handler's command to start the exercise except where anticipation is allowed.
9. WRDX only: Dog retrieves distance markers.
10. Dog leaves test area before being put on leash at end of testing.

### **Section 19. Regulations common to all exercises:**

Where delivery to hand is required, if the dog drops the article on land or water before it completes the delivery, the handler may direct the dog to pick it up. If the dog does so and completes the delivery within the suggested time, it will not fail, **unless otherwise specified in the exercise.**

When the word "directly" is used in an exercise, it does not necessarily mean in a straight line, since some dogs naturally swim in an arc to reach a destination.

Physical guidance or assistance means restraining, pushing, or pulling the dog by its collar, fur, or body, or the use of hands, legs, or any part of the handler's body in a manner that is not allowed.

Once the judge states or signals "You may begin", the handler must keep his/her hands off the dog.

"The dog enters the water" means that the dog has committed itself to the exercise and has at least 3 feet in the water.

"Dog leaves the water" means the dog has committed itself to leaving the water by having at least 3 feet out of the water.

**Verbal, hand signals and/or voice produced whistle encouragement is allowed by the handler to send their dogs and while the dog is working.**

**For the WRD and WRDX levels stewards will not use the dog's names when calling.**

### **Section 20. Suggested Time Limits**

Suggested time limits for each Junior, Senior and **Excellent** Exercise appear at the ~~conclusion~~ **end** of each exercise. Under no circumstances will time limits less than those suggested be imposed. The limits may be extended by the judges for extreme or unusual conditions and situations. If adverse site or weather conditions exist, and the judges feel that extended time is needed to complete a particular exercise, they should state the time limit that will be used prior to judging. Judges may also extend a time limit for an individual dog, but only if the dog began working immediately at the start of the exercise and continued actively working during the entire exercise.

At any time, the judges shall retain the discretion to whistle off as "failed" any dog that does not demonstrate an understanding of an exercise.

Judges are to report the reasons for any change made in the suggested time limits to the Test Chairperson, to be included with the Test Chairperson's report. Judges must note any modifications made on the Judges' Evaluation Forms.

### **Chapter III - Standard of Performance - Junior Division**

#### **BASIC CONTROL**

Dogs with AKC or CKC Companion Dog titles are exempt from the Basic Control exercises. Such dogs will receive a passing score from each judge in this exercise.

Basic Control will be performed off lead in a ring about 40 x 50 feet. There are three parts to the Basic Control: Controlled Walking, a Recall, and a One-Minute Down. **The only sit required in Basic Control is at the start of the Recall exercise.** The dog may be guided gently by the collar between exercises. Extra hand signals, verbal commands, and other encouragement are allowed on the motion exercises.

If a Test Committee schedules the Basic Control Exercise on the day preceding the water exercises, it must also offer Basic Control on the day of the Water test for anyone who is unable to attend the previous day.

**Controlled Walking:** The dog must walk with the handler in response to the commands given and should remain within arm's reach of the handler at all times. The handler must not touch the dog, but may command and encourage the dog. The dog is not required to remain in any particular position, but should remain within arm's reach. **The dog does not have to sit at any time during this exercise, however, handlers may GENTLY push the dog into a sit if they so chose.**

During this exercise one judge will call commands, but both judges will score. The commands from the judge will include: forward, left turn, right turn, about turn, halt, and exercise finished. It is the judge's option in what order he calls the commands but the calling judge will call the same pattern for each dog and handler.

**Principal Parts of the Exercise:**

1. The dog will respond to his handler's commands and walk in a controlled manner.
2. The dog will walk within arm's reach of the handler.

**Failing Performance:** The dog will fail for any of the failures common to all exercises (Chapter 2, Section 4518) and if:

1. The dog is frequently beyond the reach of the handler.
2. The dog fouls the ring.
3. Handler must constantly adapt to the pace of the dog.
4. Dog leaves the ring.
5. Dog is considered unmanageable by the judges.
6. Dog must be physically handled by the handler during the heel pattern.

**Recall:** The recall is performed the full length of the ring. The judge will instruct the handler to "Sit your dog" (**handler may GENTLY push dog into a sit**) and will ask "Are you ready?" The judge will then instruct the handler to "Leave your dog". The handler must give only one stay command. The stay command can be given by both voice and hand simultaneously. The dog must stay until called by the handler. The handler will walk to the opposite side of the ring, turn, face the dog, and remain in place until the exercise is finished. The judge will instruct the handler **by voice or hand signal** to call the dog. A signal, verbal command, or simultaneous commands may be used to call the dog. Extra hand signals and vocal commands are allowed after the dog begins to move. The dog must respond within 10 seconds. The dog will come close enough to be touched by the handler and should sit, **but is not required to sit**, facing the handler. The judge's commands to the handler are "Sit your dog", "Leave your dog", "Call your dog", and "Exercise finished". (the dog is not required to finish).

**Principal Parts of the Exercise:**

1. The dog will remain in place until called by the handler. "Stay" may be both verbal command and/or signal.
2. The dog will respond within ten (10) seconds.

3. The dog will come within arm's reach of the handler.
4. The handler will remain in place until the exercise is complete.

**Failing Performance:** The dog will fail for any of the failures common to all exercises

(Chapter 2, Section 15 18) and if:

1. The dog does not stay in place (~~changing position from the sit to a down will not be a failure~~) **in a sit.**
2. The handler gives more than one "stay" command or more than one "come" command. (Hand signals and voice commands must be given at the same time to be considered "one command".)
3. The dog does not respond to the "come" command within 10 seconds.
4. The dog does not come.
5. The dog does not go to the handler.
6. The dog goes to the handler but remains out of reach.
7. The dog fouls the ring.

**One Minute Down:** The One Minute Down is a group exercise performed with the handlers across the width of the ring. The judges will keep each group to a maximum of ten (10) dogs. The handlers and their dogs (on lead) will enter the ring **in catalog order (except for bitches in season and handlers with more than one entry)** and line up along one side as instructed by the judge. The handlers will remove the leads and place them behind their dogs. When in position, the judge will ask "Are you ready?" and will then say "Down your dogs". The handlers may manually put their dogs down. **Dogs do not have to sit before lying down.** The judge will instruct the handlers to "Leave your dogs" **and starts the timing.** Handlers will give one (1) command to stay. The stay command may be a verbal command, hand signal, or a simultaneous verbal and hand signal. The handlers will walk to the opposite side of the ring, turn, and face their dogs. After one minute, the judge will say "Return to your dogs". The handlers will walk around the dog and return to heel position. The dog must remain down until the handler returns to the heel position. The handlers will not release their dogs until the judge says "Exercise finished".

**Principal Parts of the Exercise:**

1. The handler will down the dog.

2. The handler will give the dog one (1) command to stay, leave the dog, and walk to the opposite side of the ring. (Simultaneous voice and hand signal permitted.)
3. The dog will remain down until the handler returns to the heel position.
4. The handler will release the dog when the judge says "Exercise finished".

**Failing Performance:** The dog will fail for any of the failures common to all exercises (Chapter 2, Section 45 18) and if:

1. The handler gives more than one command to stay.
2. The dog moves substantially even though still down.
3. The dog sits or stands any time before the handler returns to the heel position.
4. The dog fouls the ring.

## **SINGLE RETRIEVE**

### **Standard of Performance**

The dog and handler wait on shore facing the water. The judge will ask the handler, "Are you ready?" and then will instruct the handler, "You may begin". At this point, the handler must have hands off the dog and/or the dog's collar. The handler will throw the bumper at least thirty (30) feet out from shore and into swimming depth water for the dog. The bumper may have a short line attached to facilitate throwing. Anticipation is allowed. ~~The handler sends the dog with voice commands, hand signals, and/or whistle.~~ The dog swims out to the bumper, retrieves it, and brings it to the handler on the shore. The dog must deliver the bumper to hand. ~~Verbal encouragement, extra commands, and whistles are allowed as the dog is working.~~ The dog need not sit to deliver the bumper to the handler. A "finish" is not required.

If the throw is not of adequate distance, the judges will instruct the handler to throw the bumper again. The test committee will appoint a steward to serve as a designated thrower in the event one should be needed.

The dog may bring the bumper to the closest point of land; in which case, the handler may move along the shore to that point to receive the article without stepping into the water. The point of land at which the dog delivers the bumper may be outside the marked test area. If the dog fails to retrieve on the first command, it may be redirected by the handler ~~with voice commands, hand signals, and/or whistle~~ to retrieve the bumper.

The judges will signal completion of the exercise when the dog has delivered the bumper to hand, or when the dog has failed the exercise.

### **Principal Parts of the Exercise:**

1. The dog is sent to make the retrieve.
2. The dog retrieves the bumper that was thrown into swimming depth water and delivers it to hand.

**Failing Performance:** The dog will fail for any of the failures common to all exercises

(Chapter 2, Section 45 18) and if:

1. The dog does not retrieve the bumper.
2. The dog gets the bumper but drops it and refuses to pick it up.
3. The dog refuses to deliver the bumper to hand.
4. The handler assists the dog in marking the bumper by throwing objects.
5. The dog leaves the water without making the retrieve.

Suggested Time Limit: Sixty (60) seconds. Timing starts when judge instructs, "You may begin".

## **DROP RETRIEVE**

### **Standard of Performance**

The dog and handler wait on shore facing the water. Stewards will paddle **in a canoe or kayak** across the test site approximately fifty (50) feet from shore. Upon a signal from a judge, a steward will quietly place ~~an approved Coast Guard (American or Canadian)~~ **the entrant's** life jacket or ~~an approved Coast Guard (American or Canadian)~~ boat cushion in the water on the seaward side of the watercraft, making no effort to attract the dog's attention to the drop. The judges will select the article the morning of the test, and it will be the same for all dogs. After the watercraft has cleared the area, a judge will ask the handler, "Are you ready?" and then instruct the handler, "You may begin". At this point, the handler must have hands off the dog and/or the dog's collar. The handler will send the dog ~~with voice commands, hand signals and/or whistles~~ in the direction of the floating article. ~~Verbal encouragement and extra commands are allowed as the dog is working.~~ The dog swims out to the article, retrieves it, and returns it to the handler on shore. The dog must deliver the article to hand. The dog may bring the article to the closest point of land; in which case, the handler may move along the shore to that point

to receive the article without stepping into the water. The closest point of land may be outside the marked test site. No sit or finish is required. **The judges will signal completion of** the exercise ~~is finished~~ when the dog delivers to hand, or when the judges indicate the dog has failed. ~~The judges will signal a completed exercise.~~

### **Principal Parts of the Exercise:**

1. The steward drops a floating article on the seaward side of the watercraft without attracting the attention of the dog.
2. The dog takes direction **from the handler.**
3. The dog locates the article and delivers it to hand.

**Failing Performance:** The dog will fail for any of the failures common to all exercises (Chapter 2, Section 45 **18**) and if:

1. The dog does not retrieve the article.
2. The dog gets the article, drops it, and will not pick it up.
3. The dog fails to deliver the article to the handler.
4. The handler aids the dog in marking the article by throwing objects.
5. The dog leaves the water without making the retrieve.

Suggested Time Limit: Ninety (90) seconds. Timing starts when judge instructs, "You may begin".

## **TAKE A LINE**

### **Standard of Performance**

The dog and handler wait on shore facing the water. The land steward will give the handler one end of the line. Before the exercise begins, the calling steward, on the direction of the judge, will walk up to the dog, pet it briefly and ask its name. The steward will swim away from shore into position at the **center and** fifty (50) foot mark. When the steward is in position, a judge will ask the handler, "Are you ready?" and then will instruct the handler, "You may begin" **while simultaneously signaling the steward to begin calling.** At this point, the handler must have hands off the dog and/or the dog's collar. ~~As soon as the judge signals the beginning of the exercise, the steward will begin calling the dog.~~ The steward will use the dog's name and must use the same manner of calling for each dog.

**After** the judge says "You may begin", the handler gives the dog one end of a seventy-five (75) foot floating line. The line may be knotted at one end to facilitate carrying. The handler may gently place the line in the dog's mouth, entice the dog to take the line, or command the dog to take the line. The line may not be tossed into the water for the dog to grab. If the line is dropped prior to the dog committing to the water, the handler may pick it up and start again. ~~Once the dog has committed to the water, the handler may command the dog to pick it up but may not touch the line.~~ **If the dog drops the line on shore but commits to the water the handler may pick up the line and hand it to the dog as long as the dog does not leave the water with more than two (2) feet and the handler does not enter the water. If the dog commits to the water and drops the line in the water the handler may command the dog to pick it up but may not touch the line.**

The dog will hold the line in its mouth, ~~and on voice commands, hand signals, and/or a whistle from~~ **and on the handler's command** will enter the water and carry the line to the steward. ~~Verbal encouragement and extra commands are allowed as the dog is working.~~ The handler may play out the line to avoid entanglement but will keep one end on shore. The dog must bring the line close enough for the steward to reach it without changing his/her location in the water. The dog must hold the line in its mouth until the steward can grasp it, but the dog does not have to relinquish the line to the steward. **The dog must have the line in his/her mouth when the steward takes hold of the line.** The steward will hold the line up for the judges to see. The exercise is finished when the steward has hold of the line, or when the judges indicate the dog has failed. The judges will signal completion of the exercise. The handler will then call the dog to shore. The dog may continue to hold the line in its mouth and accompany the steward to shore.

#### **Principal Parts of the Exercise:**

1. The dog will hold the line in its mouth.
2. The dog will leave the handler.
3. The dog will deliver the line to the steward.

**Failing Performance:** The dog will fail for any of the failures common to all exercises (Chapter 2, Section 45 **18**) and if:

1. The handler physically guides the dog any time after the exercise has begun.
2. The dog leaves the water after it has been sent, and before it delivers the line to the steward.
3. The dog does not come close enough to the steward to allow the steward to take hold of the line while the dog is holding it.
4. The handler tosses the line in the water for the dog to retrieve

Suggested Time Limit: Ninety (90) seconds. Timing starts when judge instructs, "You may begin".

## TOW A BOAT

### Standard of Performance

The dog will remain on shore with the handler. The handlers' 8-foot floating line with attached boat bumper will be placed in the boat by a steward. The stewards will be positioned in an approved rowboat fifty (50) feet from shore. The dog and handler will approach the water, and the judge will ask, "Are you ready? The judge will instruct the handler "You may begin". At this point, the handler must have hands off the dog and/or the dog's collar. As soon as the judge signals the beginning of the exercise, a steward in the boat will attract the team's attention by calling the dog's name and splashing the bumper next to the boat. The dog should swim to the boat, take the bumper or line from the **calling** steward, and tow the boat to shore. The **calling** steward will splash the bumper close to the boat but may not throw it in front of the dog. **If the calling steward accidentally falls out of the boat the exercise may not be completed and will have to be retested.** ~~Verbal encouragement and extra commands are allowed as the dog is working.~~ The dog may hold either ~~the line or~~ the bumper **or the line adjacent to the bumper**. The dog may bring the boat to the closest point of land, in which case, the handler may move along the shore to meet the dog. The handler will not enter the water until the dog is at wading depth for the dog. The dog must pull the boat until it touches the bottom, at which time the judges will signal completion of the exercise.

### Principal Parts of the Exercise:

1. The dog will take direction and swim to the boat upon command.
2. The dog will take the bumper or line its mouth from the **calling** steward.
3. The dog will tow the boat to shore and beach it.

**Failing Performance:** The dog will fail for any of the failures common to all exercises (Chapter 2, Section 45 **18**) and if:

1. The dog does not swim out to the boat.
2. The dog refuses to take the bumper or line from the **calling** steward.
3. The dog does not pull the boat to shore **or beach the boat**.
4. The dog drops the equipment and does not respond to the handler's commands to pick it up.

5. The dog comes out of the water prior to completion of the exercise, unless dog is actively in the process of towing and beaching the boat in order to complete the exercise

Suggested Time Limit: Ninety (90) seconds. Timing starts when judge instructs, "You may begin".

## **SWIM WITH HANDLER**

### **Standard of Performance**

The dog and handler are on shore at a spot designated by the judges. The judge will ask, "Are you ready?" and then will instruct the handler, "You may begin". At this time, the handler must have hands off the dog and/or the dog's collar. Dog and handler will approach the water and wade out together to swimming depth for the dog. The dog and handler will swim together for twenty (20) feet. The prescribed distance is not judged until both the handler and the dog have begun swimming. The dog may swim in any position within a four-foot (4) radius of the handler. The dog may not swim on top of the handler nor otherwise impede the handler from reaching the prescribed distance. **The handler may swim with any type of swimming stroke.** A judge will signal when the required distance is reached. The handler will stop swimming and command the dog to turn toward shore. The handler may not physically turn the dog. The handler then holds onto the dog and encourages the dog to tow him to shore. The dog is to do so promptly, although one or two circles by the dog for orientation with the shoreline are allowed. The dog may tow the handler by having the handler hold onto the dog or by the dog holding the handler by the arm. If the dog holds the handler by the arm, some protection on the arm is permitted. This protection will be flush with the skin and there will be nothing dangling from it.

The handler must be free floating and allow him/herself to be towed by the dog. A small amount of motion by the handler for balance is allowed. Once the dog has reached wading depth, the handler may stand and walk to shore with his/her dog. The judges will signal completion as soon as the dog is walking.

### **Principal Parts of the Exercise:**

1. The dog is willing to accompany the handler into the water.

2. The dog is willing to swim with the handler the prescribed distance.
3. The dog is willing to tow the handler to shore.

**Failing Performance:** The dog will fail for any of the failures common to all exercises (Chapter 2, Section 18 45) and if:

1. The dog must be physically guided into the water or while swimming.
2. The dog leaves the four-foot (4) radius of the handler and does not immediately return to the handler on command.
3. The dog physically interferes with the handler's ability to swim the prescribed distance.
4. The dog refuses or is unable to tow the handler to shore.
5. The handler makes swimming strokes that are interpreted by the judges as assisting the dog.
6. The dog leaves the testing area before being put on leash after the exercise is complete.

Suggested Time Limit: Ninety (90) seconds. Timing starts when judge instructs, "You may begin".

## **Chapter IV - Standard of Performance - Senior Division**

### **DOUBLE RETRIEVE**

#### **Standards of Performance**

~~The two articles to be retrieved will be an approved Coast Guard (American or Canadian) boat cushion and an approved Coast Guard (American or Canadian) life jacket.~~ With the dog and handler on shore facing the water, a judge will ask, "Are you ready?" Stewards will paddle a canoe or kayak across the test site and drop the handlers life jacket and boat cushion two articles fifty feet (50 feet) from shore and fifty (50) feet apart on the land side of the watercraft. The articles will be splashed two or three times to attract the dog's attention.

When the articles are in place, the stewards will **quickly** paddle clear of the site, and a judge will tell the handler which is the first article to be retrieved. It will be the same order for each dog unless conditions necessitate a change **and will be decided before the Senior division begins**. A judge will then instruct the handler, "You may begin". At this time, the handler must have hands off the dog and/or the dog's collar. The dog and handler must start from the center of the test area; however, once the judges indicate the start of the exercise, the dog and handler are allowed to move along the beach. The handler sends the dog for the first article from any point on the shore. ~~with voice commands, hand signals, and/or whistles. Extra commands and voice encouragement are allowed as the dog works.~~ The dog must retrieve the article and deliver it to the hand of the handler on shore. The dog may bring the article to the closest point of land, in which case, the handler may move along the shore to that point to receive the article without stepping into the water. The closest point of land does not have to be within the marked test area. The handler may pat and praise his dog before he sends it for the second article; no other physical manipulation of the dog is allowed. The dog will be directed for the second article from any point on the beach. When the second article is delivered to hand on shore in the same manner as the first one, the judges will signal completion of the exercise.

#### **Principal Parts of the Exercise:**

1. The dog takes direction and retrieves both articles in the specified order.
2. The dog is sent for the first article and returns it to the handler on shore, delivering it to hand.
3. The dog is then sent for the second article and returns it in the same manner.

**Failing Performance:** The dog will fail for any of the failures common to all exercises.

(Chapter 2, Section 45 **18**) and if:

1. The dog gets the wrong article.
2. The dog does not retrieve both articles.
3. The dog does not deliver both articles to hand.
4. The dog comes out of the water prior to completion of the first retrieve.
5. The dog comes out of the water after it has been sent for the second retrieve without the article.
6. The handler assists the dog in marking an article by throwing objects.

Suggested Time Limit: Three (3) minutes. Timing starts when judge instructs, "You may begin".

## RETRIEVE OFF A BOAT

### Standard of Performance

The dog and handler will be on shore. The judge will ask "Are you ready?" and then will instruct the handler "You may proceed". At that point, the handler must have hands off the dog and/or the dog's collar. The dog **and handler** will board a boat and travel ~~with the handler~~ in a safe and controlled manner. The dog and handler have thirty (30) seconds to board and be ready for departure. The thirty (30) second boarding time is separate from the suggested time for completing the retrieve.

The dog must willingly board the platform on the boat without physical assistance from the handler within the 30-second time limit and remain on the platform, under control, until required to exit. **Once the dog has boarded the platform it may not jump off the platform at any time even if the boat is still beached or being pushed out. If a problem develops while pushing the boat out which causes the dog to jump off the platform, it is up to the judges to decide whether the exercise should be restarted.** The dog must exit from the platform. The handler is responsible for placing the paddle on the platform and is allowed to sit on the platform with his/her feet in the water **after the boat is free floating.**

The dog and handler go out ~~in~~ **on** the boat rowed by a steward. The handler may place an arm on the dog on the ride out as long as he/she is not restraining the dog. ~~They go out~~ **At** fifty (50) feet from shore, ~~and~~ the boat is positioned parallel to shore. A judge will signal "You may begin" by an arm signal or one short blast on a whistle. At that signal, the handler must have hands off the dog and/or the dog's collar. ~~Upon the signal from the judge,~~ The handler throws a ~~canoe or raft~~ paddle at least ten (10) feet from the boat. The judges must be able to see the paddle thrown to judge the 10-foot distance. When the paddle is in the water, the dog must jump willingly from the platform of the boat, within thirty (30) seconds, to retrieve the paddle. The dog must return the paddle to the boat and ~~relinquish it~~ **deliver the paddle to hand** to ~~either~~ the handler **only** ~~or the steward.~~ ~~Verbal encouragement and extra commands are allowed while the dog is working.~~ The handler is allowed to splash the water to attract the dog's attention when the dog is returning the paddle to the boat. When the dog has relinquished the paddle to the handler ~~or steward,~~ the judges will signal completion of the exercise.

### Principal Parts of the Exercise

- 1.The dog will board the board willingly, without physical assistance, within the thirty (30) second time limit for boarding.
- 2.The dog will remain on the platform, under control, until required to exit.

3. The handler will throw the paddle at least ten (10) feet.
4. The dog will wait on the boat until the paddle is in the water.
5. The dog will jump from the boat within thirty (30) seconds from the time the oar is in the water.
6. The dog will retrieve the paddle.
7. The dog will return the paddle to the boat and ~~relinquish it~~ **deliver it to hand** to the handler ~~or the steward~~.

**Failing Performance:** The dog will fail for any of the failures common to all exercises (Chapter 2, Section ~~45~~ **18**) and if:

1. The dog refuses to willingly board the boat.
2. The dog refuses to jump from the boat within thirty (30) seconds.
3. The dog jumps before the paddle hits the water.
4. The dog refuses to return the paddle to the handler ~~or the steward~~.
5. The dog does not exit the boat from the platform or does not remain under control on the platform during the exercise.
6. The dog is restrained while on the boat.
7. The dog and handler are not aboard and ready for departure within the thirty (30) second time limit.

Suggested Time Limit: Ninety (90) seconds is allowed to complete the entire exercise: however, the dog must jump within thirty (30) seconds. Timing starts when judge instructs, "You may begin".

## **TAKE A LIFE RING**

### **Standard of Performance**

The life ring is attached to a line three (3) feet to five (5) feet in length. The line may be knotted in some fashion to facilitate the dog holding and towing it. One of three water stewards will be designated as the "victim", and this steward will assume the same position in the water for each dog. **The judges will decide which position the calling steward will take.**

The dog and handler will wait on shore in the center of the test area. A judge will ask the handler, "Are you ready?" and will then instruct three stewards to enter the water and swim out to a point approximately seventy-five (75) feet from shore. When they have reached the 75-foot distance, they will be spaced at thirty-foot (30) intervals. The thirty-foot (30) intervals shall be measured on shore and marked in a visible fashion to enable the stewards to maintain their positions. A judge will indicate to the designated "victim" the start of the exercise by a hand signal or one short blast on his whistle. That steward will begin to splash and call for help but may not call the dog by name. The other two stewards shall quietly tread water, remaining in position and watching the "victim".

~~At the same time the judge is signaling the steward to begin calling the~~ judge will ~~then~~ also instruct the handler "You may begin". At that time, the handler must have hands off the dog and/or the dog's collar. Once the judges indicate the start of the exercise, the handler and dog may move to any position on the beach before the dog is sent. The handler will give the line attached to the life ring to the dog. The dog will take it on command without the handler having to physically put it into the dog's mouth. The handler will send the dog to the "victim" in distress ~~by voice commands, hand signals, and/or whistles~~. If the dog drops the line, the handler may command the dog to retake it, but the handler may not pick up the line and start again.

The dog is to swim "directly" to the calling person in the water and carry the life ring close enough so that the "victim" may grab hold of it. ~~The word "directly" does not necessarily mean in a straight line, since some dogs naturally swim in an arc to reach a destination.~~ If a dog appears to start toward the wrong steward and can be verbally redirected by the handler to go to the designated "victim", the dog will pass. As long as the dog is working, it should not fail until it delivers the life ring to the wrong steward or exceeds the time limit for the exercise. The steward must not use swimming strokes to reach for the life ring and is required to hold the life ring while being towed to shore. ~~Verbal encouragement and extra commands are allowed as the dog is working.~~ When the dog and "victim" reach wading depth water for the dog, the judges will signal completion of the exercise.

#### **Principal Parts of the Exercise:**

1. The dog will hold the line attached to the life ring.
2. The dog goes to the person in distress.
3. The dog comes close enough for the "victim" to grab hold of the life ring.
4. The dog tows the "victim" to shore.

**Failing Performance:** The dog will fail for any of the failures common to all exercises (Chapter 2, Section 45 **18**) and if:

1. The dog refuses to hold the line.

2. The dog goes to the incorrect steward.
3. The dog fails to bring the ring close enough for the "victim" to reach it.
4. The dog fails to tow the "victim" to shore.
5. The dog drops the equipment, and the handler assists the dog in marking the equipment by throwing objects.
6. The dog leaves the water prior to completion of the exercise.

Suggested Time Limit: Two (2) minutes. Timing starts when the judge instructs, "You may begin".

## **UNDERWATER RETRIEVE**

### **Standard of Performance**

This exercise starts on the beach. The judge will state "Are You Ready" and "You may proceed into the water". The dog will willingly accompany the handler into the water. The handler must have hands off the dog and/or the dog's collar at this time. The point of the dog's elbow will measure the required depth. When dog and handler are in position, at depth, a judge will ask, "Are you ready?" A judge will then instruct the handler, "You may begin". The handler will toss the object into the water at least three (3) feet in front of the dog and parallel to shore. The object to be retrieved will be no more than twelve (12) inches long and 4 inches tall. When submerged, it should extend no more than four (4) inches from the bottom and should be weighted evenly so that it will sink immediately.

The handler may not touch the dog after the object is thrown. The handler may be beside the dog so that the dog can immediately deliver the object to hand. The handler's position should not block the view of the judges. The dog will have a total of three minutes from the time the object is first thrown to retrieve it from the bottom and deliver it to the handler.

The handler has the option of throwing the object as often as necessary, but the total time for the entire exercise is not to exceed three minutes. **Each new throw must be at the required depth and at least three (3) feet in front of the dog.** The judges will signal completion of the exercise.

A dog may paw or submerge its head on this exercise, but it must pick up the article and deliver to hand.

The handler may use two identical underwater retrieve articles though they may be different colors. If the first is lost in the water, due to murky water conditions, the handler

may ask for their second article but the dog must then retrieve the second article, not the first.

### **Principal Parts of the Exercise:**

1. The dog and handler enter water elbow deep for the dog.
2. The handler throws the object at least three (3) feet in front of the dog.
3. The dog is sent to retrieve the object.
4. The dog retrieves and delivers it to the handler who may be standing beside the dog as it retrieves.

**Failing Performance:** The dog will fail for any of the failures common to all exercises

(Chapter 2, Section 45 18) and if:

1. The dog does not retrieve the object thrown at the required depth and/or distance.
2. The dog does not deliver to hand.
3. The dog drops the article and fails to retrieve it again.
4. The handler touches the dog.

Suggested Time Limit: Three (3) minutes. Timing starts when the object is first thrown.

## **TAKE A LINE/TOW A BOAT**

### **Standard of Performance**

A steward will be waiting in a rowboat seventy-five (75) feet from shore. **A steward will give the handler their 8 foot line.** The dog and handler will approach the water, and a judge will ask, "Are you ready?" Then a judge will instruct the handler, "You may begin" **while simultaneously signaling the steward to begin calling.** At this time, the handler must have hands off the dog and/or the dog's collar. The handler will give the dog an eight (8) line with a bumper attached. The dog may hold either ~~end of the equipment, the line or the bumper~~ **the bumper or the line adjacent to the bumper.** The dog will take the equipment on command. The line may not be tossed in the water for the dog to grab. If the dog drops the line or bumper ~~the handler may command the dog to retake it,~~ but the handler may not pick up the line or bumper and start again. **If the dog drops the line in the water the handler must command the dog to pick it up and may not touch the line. If the dog drops the line on shore and commits to the water the handler may**

command the dog to pick up the line if the dog can do so without more than two (2) feet leaving the water and without the handler entering the water or touching the line.

The handler sends the dog ~~with voice commands, hand signals, and/or whistles~~ to swim to the steward in the boat. The steward will attract the dog's attention by calling the dog, but not by name, and by splashing the water. While the handler is commanding the dog to swim out to the boat, he/she may not step into the water. The dog will swim out to the boat and come close enough to deliver the bumper or line to the **calling** steward in the boat. The **calling** steward shall not leave the boat to grab the line. **If the calling steward accidentally falls out of the boat the exercise may not be completed and will have to be retested.** The **calling** steward will reach for the bumper or line from the side from which the dog is approaching and **take hold of onto it the line or bumper.** ~~Verbal encouragement and extra commands are allowed as the dog is working.~~ The dog may bring the boat to the closest point of land, in which case, the handler may move along the shore to meet the dog. The handler shall not enter the water until the dog is at wading depth for the dog. The dog must pull the boat until it touches bottom, and the judges will signal completion of the exercise at that time.

#### **Principal Parts of the Exercise:**

1. The dog will take the bumper or line on command.
2. The dog will deliver the bumper or line to the **calling** steward in the boat.
3. The dog will tow the boat to shore **and beach the boat.**

**Failing Performance:** The dog will fail for any of the failures common to all exercises

(Chapter 2, Section 45 **18**) and if:

1. The dog refuses to take the bumper or line in its mouth.
2. The dog refuses to deliver the bumper or line to the **calling** steward in the boat.
3. The dog does not tow the boat to shore.
4. The dog drops the equipment and will not pick it up when directed by the handler.
5. The dog drops the equipment and the handler assists the dog in marking the equipment by throwing objects.
6. The dog comes out of the water prior to completion of the exercise, unless it is actively towing and beaching the boat to complete the exercise.

Suggested Time Limit: Two (2) minutes. Timing starts when judge instructs, "You may begin".

## RESCUE

### Standard of Performance

The dog and handler will be on shore. The judge will ask "Are you ready?" and will then instruct the handler "You may proceed". The dog will willingly board the platform on the boat and travel with the handler in a safe and controlled manner. The dog and handler have thirty (30) seconds to board and be ready for departure. The thirty (30) second boarding time is separate from the suggested time for completing the rescue.

The dog must remain under control and on the platform during the exercise until required to exit. **Once the dog has boarded the platform it may not jump off the platform at any time even if the boat is still beached or being pushed out. If a problem develops while pushing the boat out which causes the dog to jump off the platform, it is up to the judges to decide whether the exercise should be restarted.** The dog must exit from the platform. The handler must not restrain the dog on the boat. The handler may place an arm on the dog on the ride out as long as the dog is not being restrained. **The handler is allowed to sit on the platform with his/her feet in the water after the boat is free floating.**

Handler, dog, and ~~earsman~~ **rower** row out about fifty (50) feet from shore. The boat is positioned parallel to shore. When in position for the rescue, a judge will signal "You may begin" by either a hand signal or one short blast on his whistle. The handler falls or jumps into the water in any manner he/she chooses. Judges may not require that handlers exit in a prescribed manner unless safety considerations warrant it. **The dog must remain on the platform until the handler indicates that rescue is needed. Once the handler indicates that rescue is needed the timing starts and** the dog has 30 seconds to jump ~~and timing starts when the handler is in the water.~~ The dog must not anticipate the rescue and jump before the handler, jump simultaneously with the handler, or jump onto the handler. Voice encouragement is allowed, ~~but the dog may not be pushed or thrown from the boat.~~

The dog will swim directly to the handler and tow ~~him~~ the handler to safety. The dog may circle for orientation. The handler has the option of how the dog will tow him. If the dog tows by an arm, some form of protection is allowed on the arm. This protection will be flush with the skin and there will be nothing dangling from it. Some arm or leg motion for balance is allowed, but the handler is to be primarily free floating.

The dog may tow the handler to shore or back to the boat. It is the **rowing** steward's responsibility to keep the boat within the test site in case the dog elects to take its handler to the boat. The exercise is complete when the dog tows the handler to the boat **and the handler touches the boat** or reaches wading depth water near shore. The judges will indicate completion of the exercise.

### **Principal Parts of the Exercise:**

1. The dog will board the boat willingly, without physical assistance, within the thirty (30) second time limit.
2. The dog will remain on the platform, under control, until ~~required to exit~~ **the handler indicates rescue is needed.**
3. The dog sees the handler leave the boat.
4. The dog will jump within thirty (30) seconds after the handler ~~is in the water~~ **indicates rescue is needed.**
5. The dog comes to the rescue promptly.
6. The dog goes to the handler and tows the handler to shore or to the boat.

**Failing Performance:** The dog will fail for any of the failures common to all exercises (Chapter 2, Section ~~45~~ **18**) and if:

1. The dog and handler are not aboard and ready for departure within the thirty (30) second time limit.
2. The dog is restrained while on the boat.
3. The dog does not exit the boat from the platform or does not remain under control on the platform until required to exit.
4. The dog jumps before, simultaneously, or onto the handler.
5. The dog does not jump to rescue the handler within thirty (30) seconds.
6. The dog does not go to the handler.
7. The handler makes swimming strokes that are interpreted as assisting the dog.
8. The dog refuses to tow the handler to shore or to the boat.
9. **The dog leaves the testing area before being put on leash after the exercise is complete.**

Suggested Time Limit: Ninety (90) seconds is allowed to complete the entire exercise; however, the dog must jump within thirty (30) seconds.

### **Chapter V - Standard of Performance - Excellent Division**

## Exercise #1 Abandoned Boat

### Purpose:

This exercise demonstrates the dog's ability to follow his/her handler's commands, search for a line and retrieve a boat without someone calling from the boat.

### Standard of Performance

The handler's floating eight (8) foot line with plastic or canvas boat bumper attached will be attached to the front of a rowboat with the bumper placed in the boat. The steward will row the rowboat out seventy five (75) feet from shore and **must** either attach the boat to a fixed anchor, or drop an anchor from inside the boat. The boat may move freely around the anchor in the current or wind. The oars will be brought up into the boat. The steward will be facing away from the dog **except for occasional glances to see when the dog is close to the boat.**

The handler and dog will wait on the shore in the center of the test area. When the judge indicates, "you may begin", the handler will send the dog to search for the line/**bumper**. The dog will commit to swimming depth within twenty (20) seconds from the handler's first command to swim to the boat. The handler is not permitted to enter the water in this exercise. **When the dog is approximately ten (10) feet from the boat**, the steward will bring up or detach the anchor system **then toss the bumper off the seaward side of the boat, being sure to toss the bumper before the dog arrives at the boat. The steward must not touch the line or bumper again.** The steward will not make eye contact with the dog and will remain quietly in the boat **with his/her head down. The dog may go behind the boat from either end of the boat.** The dog will tow the boat to shore by either the boat bumper or the line attached to it. The dog will beach the boat. Should the dog swim back toward shore without the boat, the dog may be re-directed by the handler, **at any time, as long as** the dog responds to the redirect command by turning and swimming back toward the boat **within ten (10) seconds of the command being given.** The dog is not permitted to swim towards shore a second time without bringing in the boat. **The judges will indicate that the exercise is finished when the boat beaches.**

### Principal Parts of the Exercise

1. The dog must commit to swimming depth within twenty (20) seconds of the first command to begin the exercise.
2. The dog will swim directly to the boat and take the line or bumper in his/her mouth.
3. The dog may turn either way and will tow the boat to shore.
4. The handler will be allowed **one** opportunity to redirect the dog and the dog must respond in ten (10) seconds.
5. The dog will beach the boat.

### Failing Performance

The dog will fail for any of the failures common to all exercises (**Chapter 2, section 18**), and if:

1. The dog does not wait for the handler's command to start the **exercise**.
2. The dog does not commit to swimming depth within twenty (20) seconds of the first command to **begin the exercise**.
3. The dog does not swim directly to the boat.
4. The dog **swims back toward shore** and does not obey the redirect command within ten (10) seconds.
5. The dog swims back towards shore more than one time without having the boat in tow.
6. The dog does not take the line and tow the boat to shore **or** fails to beach the boat **in the time allowed**.

**Suggested Time Limit:** Three (3) minutes from the time the judge instructs the handler to begin.

## **Exercise #2 Multiple Person Rescue**

### **Purpose:**

This exercise will demonstrate the superior physical fitness of the Newfoundland while **simulating an open sea rescue of multiple** persons in distress.

### **Special Note:**

*The safety of the dog is of paramount importance. Due to the length of time the dog is continually swimming without the break of reaching wading depth, the judges will terminate the exercise at any time a dog is deemed to be in distress or appears to be experiencing difficulty in completing the rescue of the three stewards. The decision of the judges with regards to the safety and ability of the dog to complete the exercise is final. A grievance is not applicable when a decision is rendered by either judge with regards to the safety or perceived distress of the dog.*

### **Standard of Performance**

The dog and handler will be on shore in the center of the test area. The judge will ask, "Are you Ready?" and then will instruct the handler to proceed. The dog will board the boat and will travel with the handler in a safe and controlled manner. The dog and handler have thirty (30) seconds to board and to be ready for departure. The thirty (30) second boarding time is separate from the suggested time for completing the rescue. The dog must willingly board the platform of the boat without physical assistance from the handler and within the thirty (30)

second time limit, and will remain on the platform, under control, until required to exit. **Once the dog has boarded the platform it may not jump off the platform at any time even if the boat is still beached or being pushed out. If a problem develops while pushing the boat out which causes the dog to jump off the platform, it is up to the judges to decide whether the exercise should be restarted.** The dog must exit from the platform. The handler is allowed to sit on the platform with his/her feet in the water. The boat is rowed out **to the center of the test area** and **must be anchored with the platform one hundred and fifty (150) feet from shore and facing shore**. The rowing steward may also use the oars to keep the boat in place and platform facing the shore.

Three stewards will be designated as the “victims” and should remain the same, if at all possible, for each dog entered. While the boat is being rowed out into position the stewards will swim out to their designated locations as indicated **below**:

**Steward #1 At one hundred (100) feet from shore in line with the left marker on shore**

**Steward #2 At seventy five (75) feet from shore in line with the center marker on shore**

**Steward #3 At one hundred (100) feet from shore in line with the right marker on shore**

The stewards **MUST** watch the rower **throughout the exercise** for signals provided by the judges, since they are facing away from the **judges**. **This should be strongly emphasized to the stewards by the judges**. Once the boat is anchored into position and the stewards are in place, the judges will ask the handler if he/she is ready, at which point the judges will signal the beginning of the exercise by using an arm signal or one short blast on a whistle directed toward the stewards. The stewards will immediately **splash and call** for help. The stewards will call continuously in a manner consistent with being in distress. The stewards need not call in the same manner as one another, as there are differences in the condition and mannerisms of those needing rescue.

The handler will command the dog to jump from the boat and rescue the stewards. The dog must jump willingly from the platform of the boat within fifteen (15) seconds from the time the handler gives the first command to jump. The dog cannot anticipate and jump before being commanded to do so. **The dogs may need to orient themselves either after the jump from the boat, or after each rescue and may briefly circle near the boat platform to do so. The dog will not be allowed to circle the boat before completing a rescue. The dog will pick a steward and swim directly toward that steward within twenty (20) seconds of jumping from the boat and within twenty (20) seconds of the completion of each rescue (steward touching hands with handler). The dog may rescue the stewards in any order. The dog may look back or make a small circle while looking to the handler for further encouragement and direction but is not permitted to turn back and begin swimming toward the handler and boat without having a steward in tow. The dog is not permitted to swim past a steward, toward shore, unless circling the steward. The dog must swim close enough to the steward so that the steward may grab hold of the dog without moving from his/her position in the water. The handler is permitted to splash in the water to encourage the dog to return to the boat. The dog is permitted to bring back to the boat one, two, or all three stewards at a time. If the dog picks up more than one steward each steward should hold a side of the dog. The third steward may hold the dog or one of the other steward's life jackets.** The judges will determine whether the dog is physically able to **tow multiple stewards** without undue stress, taking into consideration both wind and current at a given test location.

**Unless it is obvious that the dog is heading for another steward**, once the dog has made an

actual pick up of a steward, any remaining stewards will soften their voices **and splash less but must continue to call and splash**. The dog **must** tow each steward back to the boat, where the handler waits on the platform. Each steward **must** make physical contact with the handler **while still holding the dog** (touches hands or hand to arm), **after which** the steward(s) will **hold** the lip of the boat, away from and behind the platform area to make room for the remaining stewards to make contact with the handler, and waiting quietly until the exercise is complete. Once the dog and steward(s) reach the boat and are touched by the handler, any remaining stewards will resume their original **calling**. The dog is permitted to check **the already rescued stewards on the sides of the boat** between each rescue attempt **but may not circle the boat more than once each**

**time.** The exercise will be signaled complete when the final steward has made the defined physical contact with the handler.

### **Principal Parts of the Exercise**

1. The dog will board the boat willingly, without physical assistance, and within the thirty (30) second time limit for boarding.
2. The dog will remain on the platform, under control, until required to exit.
3. The dog will jump from the platform of the boat within fifteen (15) seconds from the time the first command to jump **is** given by the handler.
4. The dog will swim directly to each steward and will tow the steward(s) directly back to the boat.
5. The dog will be swimming toward a steward within 20 seconds of jumping from the boat and within 20 seconds of completing each rescue.
6. **The dog will swim close enough to the boat for the handler to make physical contact with each steward.**

### **Failing Performance**

The dog will fail for any of the failures common to all exercises (**Chapter 2, section 18**), and if:

1. The dog refuses to willingly board the boat.
2. The dog and handler are not aboard and ready for departure within the thirty (30) second time limit.
3. The dog requires physical restraint by the handler, either on the beach or on the boat.
4. The dog anticipates and jumps before being commanded to do so.
5. The dog refuses to jump from the boat within fifteen (15) seconds.
6. The dog does not exit the boat from the platform or does not remain under verbal control on the platform **after boarding and** during the exercise.
7. The dog **swims elsewhere other than** to each steward.
8. **The dog circles the boat before returning a steward to the boat.**
9. **The dog does not swim toward a steward within 20 seconds of jumping from the boat or within 20 seconds of completing each rescue.**
10. The dog swims back toward the boat without a steward in tow after **heading for a steward**, or swims past the stewards toward the shoreline without attempting to pick up a steward.
11. The dog does not tow the steward(s) directly back to the boat.
12. The **dog does not come close enough for the handler to** make contact with each steward.

**Suggested Time Limit:** Six (6) minutes are suggested for completion of the entire exercise. However, the dog must jump within fifteen (15) seconds **and commit to each rescue within twenty (20) seconds**. The timing starts when the handler gives the first command for the dog to jump.

### **Exercise #3 Unconscious Victim**

#### **Purpose:**

This exercise will demonstrate the Newfoundland's ability to perform a rescue without the victim indicating that rescue is needed and without harming the victim.

#### **Standard of Performance**

The dog and handler will wait in the center of the testing area **facing away from the water**. A judge will signal the steward to enter the water. The steward will swim away from shore into position at the **center of the test area and seventy five (75) feet mark from shore**. The steward will be wearing a neoprene dry **wet/dry** suit and Exposure Protection dive gloves (**see Chapter 2, section 8**) on both hands, extending up toward the elbows. **Though a full wet/dry suit is preferred, in extreme heat the steward may opt for a neoprene jacket but must at least have full arm protection. The steward must have their hands fully in the gloves and not ball up their fingers leaving the fingers of the gloves empty.**

Once in position, the steward must float naturally on his/her back starting out with feet pointed toward shore, letting the current turn and move him/her. The steward's arms and legs should be floating as still as possible on top of the water with no motion made by strokes or kicks. The hands of the steward will be "palm up" on the surface of the water. The steward will not speak to the dog or make eye contact. Every attempt should be made by the steward to keep his/her eyes closed.

When the steward is in position, a judge will ask the handler, "Are you ready?" and then will instruct the handler to proceed. The handler will command the dog to go to the steward's rescue. The dog will commit to swimming depth within twenty (20) seconds of the first command given by the handler and will swim directly to the steward. The dog is not permitted to turn and swim back toward the handler without having the steward in tow. Upon reaching the steward, the dog **MUST** take either of the protected arms or hands, or the life jacket of the steward into its mouth, using a gentle hold, and will tow the steward to almost wading depth for the dog. The dog may circle the steward once or twice to find a protected arm/hand, or to obtain proper grip on the life jacket **but must not cross over the steward's body or legs**. The dog may let go of the steward to adjust its grip; but must immediately take hold again **and may not swim away from the steward. The dog may not "push" the steward to shore but must have a hand, arm or life jacket in his/her mouth to complete the rescue.** The steward must remain still, free floating, and may not make any swimming strokes. The handler will enter the water to assist the steward and the dog as the dog is returning with the steward in tow. The handler will wait at a depth just prior to the dog's wading depth, as **previously** approved by the judges. When the handler has a hand on the steward, the judge will signal completion of the exercise.

**If at any time the dog's grip becomes painful the steward must signal to the judges and stop the exercise. The handler must immediately enter the water and quickly reach the dog and steward to release the dogs grip if the dog does not respond to a command to do so.**

## Principal Parts of the Exercise

1. The steward (who is not overly familiar with the dog) will swim out and float in the water without attracting the dog's attention.
2. The handler will notice the steward and will send the dog to rescue the steward.
3. The dog will swim to the steward, will take hold of the protected arm/hand or life jacket of the steward, and, using a gentle hold, will tow the steward to just prior to wading depth for the dog.

## Failing Performance:

The dog will fail for any of the failures common to all exercises (Chapter 2, section 18), and if:

1. The dog does not wait for the handler's command to start the rescue.
2. The dog fails to commit to swimming depth within twenty (20) seconds of the handler's first command to start the rescue.
3. The dog does not swim directly to the steward.
4. The dog refuses or is unable to tow the steward to shore.
5. The dog climbs on or otherwise jeopardizes the steward's safety or circles more than twice.
6. The dog takes hold of the steward by other than a protected arm, hand or life jacket.
7. The dog lets go of the steward's hand/arm or life jacket and leaves the steward before the handler has contact with the steward.
8. The dog turns back and swims toward shore without completing the rescue.
9. The dog grasps the steward too firmly, causing pain, discomfort or potential injury.

**Suggested time Limit:** Two and one half (2.5) minutes. Timing starts when the handler gives the first command to start the rescue.

## Exercise #4 Capsized Raft

### Purpose:

The purpose of this exercise is for the dog to search for a victim trapped under a raft, to dive under the raft and back out to rescue the victim.

### Standard of Performance

The dog and handler will wait in the center of the test area. A canoe, kayak or rowboat will tow an inflatable raft, with one steward aboard into position from right to left or left to right, as wind/current conditions indicate, across the test area seventy five (75) feet from shore. When the inflatable raft is in position (seventy five (75) feet out from the center of the test area, parallel

to shore, the craft used for towing will very quickly exit the testing area, but will remain ready to retrieve the **raft** at the conclusion of the exercise.

The judge will ask "Are you Ready" and will then signal the calling steward to capsize the raft. The steward will yell as he/she capsizes the raft, attracting the attention of the dog. While calling for help the steward will adjust his/her position beneath the overturned raft so that he/she is toward the stern of the raft and holding the shore-side of the raft approximately three (3) inches from the surface of the water. The steward should also be sure that the raft is oriented parallel to shore and to adjust his/her position as needed.

As soon as the raft is overturned the handler will command the dog to rescue the steward. The dog will commit to swimming depth within twenty (20) seconds of the first command **swimming directly toward the raft**. The dog may look back toward the handler for further encouragement and direction, however, the dog is not permitted to turn back and begin swimming toward shore without having the steward in tow. The steward will drop the shore side of the raft to level with the surface of the water once the dog is approximately ten (10) feet from the raft. Upon reaching the raft, the dog will swim in under the raft from any direction **but may not circle the raft more than one (1) time**. Once the dog is under the raft the steward will immediately take hold of the dog. The dog will then exit from under the raft in any direction. **The steward must not assist the dog under the raft or lift the raft to allow the dog to go under or exit. Once the dog has exited from under the raft**, the steward is permitted to raise the raft on the way out, if necessary for safety, and to protect the steward from catching his/her life jacket on the handles of the raft. **The dog must swim directly to shore with the steward in tow.**

The handler will wade into the water when the dog is in the process of towing the steward back toward shore. **The handler will wait at the dogs wading depth, as previously determined by the judges, to meet the dog and touch hands with the steward.** The judges will then signal the completion of the exercise. The waiting craft will retrieve the raft and will remove it from the testing area.

**Raft Requirements:** The raft must be a four (4) person raft that does not bow when inflated. It must sit flat on the surface of the water when upside down. There must not be any lines hanging from the raft. Judges and stewards must check the raft to be sure that it stays properly inflated throughout the test.

\* Before the WRDX test begins the Judges must observe the steward capsizing the raft to be sure it meets test standards (see WRDX handbook) and the weather conditions.

\* If the weather or current conditions warrant, the raft may be towed out already overturned and the steward may simulate capsizing the raft by yelling and lifting the raft over his/her head.

### **Principal Parts of the Exercise**

1. The steward capsizes the raft and begins to call for help.

2. The dog enters the water, committing to swimming depth within twenty (20) seconds, of the first command from the handler and swims **directly** to the aid of the steward beneath the capsized raft.

3. The dog swims under the raft at which time the steward takes hold of the dog, who exits out from under the raft, towing the steward.

4. The exercise is complete **when the dog reaches** wading depth, with the steward in tow **and** when the handler touches hands with the steward.

### **Failing Performance**

The dog will fail for any of the failures common to all exercises (**Chapter 2, section 18**), and if:

1. The dog does not commit to swimming depth within twenty (20) seconds of the first command given by the handler.
2. The dog begins the rescue without having been commanded to do so by the handler.
3. The dog does not swim directly to the raft or turns back **and begins swimming toward shore** without the steward in tow.
4. **The dog circles the raft more than once without going under the raft.**
5. The dog does not swim under the capsized raft to rescue the steward.

**Suggested Time Limit: Two (2) minutes.** **Timing starts when the handler gives the first command to start the rescue.**

### **Exercise #5 Line to Shore**

#### **Purpose:**

This exercise simulates rescues that Newfoundland dogs have made historically, taking a line from a boat, and making a connection to the shore to assist in the rescue of the passengers on the boat.

#### **Standard of Performance**

The dog and handler will be on shore in the center of the test area. The judge will ask “Are you ready?” and then will instruct the handler to proceed. The dog will board the boat and will travel with the handler in a safe and controlled manner. The dog and handler have thirty (30) seconds to board and to be ready for departure. The thirty (30) second boarding time is separate from the suggested time for completing the exercise. The dog must willingly board the platform on the boat without physical assistance from the handler within the thirty (30) second time limit and remain on the platform, under control, until required to exit. **Once the dog has boarded the platform it may not jump off the platform at any time even if the boat is still beached or being pushed out. If a problem develops while pushing the boat out which causes the dog to jump off the platform, it is up to the judges to decide whether the exercise should be restarted. The dog must exit from the platform. The handler is allowed to sit on the platform with his/her feet in the water.** The handler will have a one hundred and twenty-five (125) foot line, knotted at one end that he/she **must bring on** to the boat. The dog and handler will be rowed out one hundred (100) feet from shore, where the boat will be turned so that the platform is facing the shoreline. The rowing steward will hold the rowboat in position or an anchor system may be used, if conditions warrant.

The judge will indicate the beginning of the exercise by an arm signal or one short whistle blast. The handler will command the dog to voluntarily take the line and then to jump from the boat.

The dog must willingly take the line and exit from the platform of the boat with the line in his/her mouth, within fifteen (15) seconds of the first command to take hold of the line. Should the line be dropped onto the platform by the dog, **after the dog has taken the line but** prior to the dog jumping from the boat, **it will be considered a failure.** The handler is not permitted to toss the line into the water for the dog to retrieve. The dog may not anticipate and leave the boat prior to taking the line in his mouth, or prior to the handler's command to jump. Should the dog drop the line into the water as it jumps from the boat, or as the dog lands in the water, the handler may verbally **and/or by hand signal** command the dog to pick up the line. **The handler may not pull on the line or move the line around in the water to attract the dog to it.** The dog is permitted to **circle to** orient itself in order to locate the dropped line, or in case the dog goes under the surface of the water after jumping from the platform.

The dog will be directed by the handler to deliver the line to the designated steward waiting on the shoreline. However, the handler will retain the end of the line on the boat. Once the dog is in the water and beginning to swim toward shore the steward will encourage the dog to come to him/her. The handler will feed the remaining line out to the dog swimming toward shore. The dog must swim directly to shore without circling the boat, checking out the distance markers, etc. The dog will deliver the line to the steward waiting on shore. The handler may continue to direct the dog verbally **and/or by hand signals** as the dog works. The dog may pause and look back towards the handler once he/she reaches his wading depth; however, the dog is not permitted to turn and swim back towards the handler prior to delivering the line to the steward. It will not be the responsibility of the steward to direct the dog to hold onto the line. The dog does not have to relinquish the line to the steward. **The steward must only touch the line and not take the line from the dog.** The exercise will be complete when **the steward touches the line without stepping into the water.** When the whistle is blown by the judges to signal completion of the exercise, the steward will hold the dog gently by the collar until the handler is brought back to shore.

### **Principal Parts of the Exercise**

1. The dog will board the boat willingly, without physical assistance, within the thirty (30) second time limit for boarding.
2. The dog will remain on the platform, under control, until required to exit.
3. The dog will willingly take the offered line from the handler when commanded to do so.
4. The dog will jump from the platform of the boat within fifteen (15) seconds **of the first command to jump.**
5. The dog will swim directly to the shoreline with the line in its mouth.
6. The exercise will be complete when the steward waiting on shore **has touched the line.**

### **Failing Performance**

The dog will fail for any of the failures common to all exercises (**Chapter 2, section 18**), and if:

1. The dog refuses to willingly board the boat.
2. The dog and handler are not aboard and ready for departure within the thirty (30) second time limit.

3. The dog receives physical assistance, restraint or unnecessary contact with the handler while on the beach or the boat.
4. The dog will not willingly take the line when commanded to do so by the handler.
5. The dog drops the line before jumping from the boat.
6. The dog anticipates and jumps before having been commanded to do so.
7. The dog refuses to jump with the line in its mouth within fifteen (15) seconds.
8. The dog does not exit the boat from the platform or does not remain under control on the platform after boarding and during the exercise.
9. The dog fails to deliver the line to the steward waiting on shore.
10. The dog begins swimming back towards the handler at any time before delivering the line to the steward, other than during obvious attempts to orient himself with the boat and shoreline after jumping into the water.

**Suggested Time Limit:** Three (3) minutes are allowed to complete the entire exercise. However, the dog must jump within fifteen (15) seconds. The timing starts when the handler gives the command for the dog to jump.

## Exercise #6 Hidden Victims

### Purpose:

This exercise will demonstrate the Newfoundland's ability to search for and rescue victims that are in distress but are not in sight.

### Standard of Performance

Two stewards, riding on the boat platform, will be rowed out seventy five (75) feet from shore. The boat MUST be anchored parallel to shore at the center of the test area. If the oars are needed to stabilize the boat they must be placed in the boat when the dog is within ten (10) feet of the boat. The two stewards will quietly exit the boat, one at a time. They will then move to the seaward side of the boat, where they will hold onto the lip of the boat, with one steward at the bow end of the boat and the other towards the stern. After having given a brief arm signal to the judge that the stewards are in place, the rower will remain quietly in the middle of the boat primarily facing away from the dog.

The dog and handler will wait at the center of the test area on shore. When notified that the stewards are in place, a judge will then signal for the stewards to begin calling for help. The rower will relay this signal to the stewards. The stewards will call for help in a manner realistic with being stranded. The stewards and their splashing must not be visible from shore. After the stewards have started calling for help the handler will send the dog. The dog will enter the water committing to swimming depth within twenty (20) seconds of the first command from the handler to begin the rescue and will swim directly to the boat. The dog may look back toward the handler for further encouragement and direction, however, the dog is not permitted to turn back and begin swimming toward shore without having the steward(s) in tow. The dog is to swim

close enough **for the steward** to reach out and to take hold of the dog while still having hold of the side of the boat. It is the dog's option to bring in one or both stewards at the same time. If, **while towing the first steward**, the dog swims close enough to the second steward so that the second steward is able to reach out and to take hold of the dog while still having hold of the side of the boat, the dog will be deemed to have opted to bring in both stewards at the same time. If the dog brings in both stewards at the same time, the stewards will take hold of each side of the dog, toward the dog's hindquarters. **The stewards are not to hold on to each other** and stewards should not speak during the time **in which** they are being towed to shore. Should the dog opt to bring in one steward at a time, the dog will tow the steward back to wading depth for the dog. The second steward will quietly hold onto the boat, having ceased calling for help as soon as the dog **has committed to shore**. The handler will enter the water as the dog is returning toward shore with a steward(s) in tow. The handler will assist the steward(s) and the dog **once the dog reaches** wading depth for the dog. Once the steward grasps hands with the handler and is helped to his/her feet, the handler will send the dog for the second steward from that point in the water. The handler **will** remain at wading depth for the dog for the second steward to be brought in. Since the second steward may not be able to see when the assistance is given to the first steward, the judge will signal to the rower to notify the **second** steward **to** begin calling again. The rescue of the second steward is to be executed in the same manner as for the first steward. When the handler has taken hold of the hands of the second steward (**whether the dog has brought in one or two at a time**) **the judge will signal that** the exercise is finished.

### **Principal Parts of the Exercise**

1. The dog enters the water on command and swims **directly** to the stewards, who are calling for help out of sight behind a rowboat.
2. The dog swims close enough for the stewards to reach the dog without losing their grip on the boat.
3. The dog tows each steward, **individually or together**, to wading depth for the dog.
4. The handler enters the water to meet the dog and each steward **at** wading depth **for the dog**, and **touches hands with each steward**.
5. **The exercise is finished when the second steward touches hands with the handler.**

### **Failing Performance**

The dog will fail for any of the failures common to all exercises (**Chapter 2 section 18**), and if:

1. The dog **fails to** commit to swimming depth within twenty (20) seconds of the **handler's** first command to **start** the rescue.
2. The dog turns back and begins swimming toward shore without a steward in tow.
3. The dog does not swim close enough to the stewards so that they can take hold of the dog without losing their grip on the boat.
4. The dog does not commit to swimming depth within twenty (20) seconds of the command to complete the rescue of the second steward.

5. The dog does not tow the steward(s) directly to wading depth.

6. The dog leaves the testing area before being put on leash after the exercise is complete.

**Suggested Time Limit:** Three (3) minutes. The timing starts when the handler gives the first command to **start** the rescue.

## Rescue Prevention Committee:

### Submitted by Donna Zink:

Pam, to do the work on outdated documents, RPC will need to contact some of the original authors to see if they want to do the update for their article. Some of the authors are committee chairs, with authority for the content possible resting within the committee. Will this fall under the policy regarding one committee assigning work to another, or will we be able to proceed with an update to the Board about the response from the author or committee? Or when an individual author is listed, even as a committee chair, is that a different circumstance? The first article that this question arose from was the Early Spay/Neuter article by Jenny Zablotney, through Gen Ed.

Would you add this as a discussion point and ask the Board to provide guidance on this issue.

To retain diversity of authorship, representing different approaches and different views, and to keep the original goal of these newsletters on focus, we need to use multiple authors. In some cases, the committee will write or re-write articles, and I will provide updates to the Board about this as we progress.

## Newf Tide Policy Committee:

TO: NCA BOARD OF DIRECTORS

FROM: Newf Tide Policy Committee (NTPC)

Beth Sell, Jeannette Voss, Julie Siefert, Patti Emmerling, Ken Wildman, Meredith Reggie, editor, *ex officio* & Aura Dean, Chair

RE: A. Question forwarded to the committee whether ROM Newfoundlands should be eligible for the *Annual of Titlists in the year in which they achieve ROM status?*

B. Permission to reword one page advertising to reflect the cost of the page without charging \$10 for additional pictures.

A. The NTPC discussed this topic at our December meeting. Because two of our members were not present, we did not conduct a vote at that time.

At our January meeting, we again discussed this topic (only one member was absent) and we concluded that Newfoundlands that attain ROM status in a given year should not be considered eligible for the *Annual of Titlists*. (4Yes BS, JV, JS, AD; 1 Abstain KW ; 1 Absent PE)

Rationale: NTPC considered the distinction that the ROM status gives a Newfoundland and felt that this distinction is not a title, but rather a recognition, a designation achieved by virtue of that Newfoundland's get. ROM Newfoundlands are held in high esteem. Indeed, that is one of the reasons the NCA devotes a section in *Newf Tide* each year to the new ROMS.

B. NTPC would like to reword the one page advertising price description to reflect current practice brought about by technological advances in the manner in which *Newf Tide* is prepared and printed. Effective immediately. Vote: Unanimous (5Y; 1 Absent)

**Current description:** Advertising Prices: Full Page: \$160, includes one picture; each additional picture is \$10; Full Page in color \$260, includes one picture; each additional picture is \$10.

**Proposed description:** Advertising Prices: Full Page: \$160; Full Page in color \$260.

The editor should have the authority and discretion to accept an ad that contains more than one picture without extra charges. Many ads are submitted electronically and do not require additional scanning. At present, the cost of the ad covers the costs involved.

## **Regional Club Committee:**

Steve Britton – Chair

Proposal: Marketing the NCA to Regional Clubs

Background Information: Based on the charge from the NCA Board of Directors to discuss increasing NCA membership from within the long-time membership of the Regional Clubs, one of the need areas identified by the RCC was additional information for the Regional Clubs to provide education to their memberships about the activities and programs of the NCA.

The Communication Subcommittee of the RCC met and discussed a potential series of articles that the NCA could produce to provide to Regional Clubs for publication regarding the various ways in which the NCA benefits the breed, and Newfoundland owners.

Proposal: Create a series of 8 articles to be promoted in a cascading manner that would highlight the programs and activities of the NCA. Pair this with the creation of buttons to be distributed to Regional Clubs that would be worn at club events to encourage people to start conversations about the NCA.

January\*\* - Article 1 to Regional Clubs

February - Article 2 to Regional Clubs

Article 1 to e-Notes

March- Article 3 to Regional Clubs

Article 2 to e-Notes

Article 1 to Facebook

April - Article 4 to Regional Clubs

Article 3 to e-Notes

Article 2 to Facebook

Article 1 to Membership Page of NCA website

\*\*The start date was arbitrarily set as January but that would of course be dependent on the start date for the project.

Campaign Parameters: "I am NCA"

Articles should feature people connected with a program to introduce the program - need powerful images of individuals enjoying their Newfs - clean crisp image with energy and vitality

Select criteria - no board members or nominated board members - do not want any appearance of being political; highlight committee chairs/members; choose to a degree based on proximity to good photographers

Suggested programs to highlight -

Puppy Buyer Referral (Naomi) Water Tests (Alex Hoops)

Draft Tests (Tom Brandt) e-Notes( MLZ)

Newf Tide (Aura Dean) Database (Deb Bridge)

Legislative Liaison (Kathy Grim) Gen Ed (Info@ email) Lisa Lathrop

The Communication Subcommittee of the RCC is happy to coordinate these articles.

### **Legislative Committee:**

Kathy Grim – Chair

Here are the items that the Legislative Committee would like for the Board to consider at the next meeting:

1. The Legislative Committee would like the Board to consider allowing us to bring in a speaker for the Annual meeting (whatever time you are willing to grant). The names of those who we might suggest are: Frank Losey (Humane Watch), Patty Strand (NAIA founder), Susan Wolfe (Cubhill Shelties and she is with SOAVA). They are all very knowledgeable about legislative issues and, in particular, the pending Federal PUPS bills. We'd like to energize the members to be actively educating their representatives in 2012.
2. The NCA Legislative Committee would like to recruit two additional members and would like to ask for Board approval to place the following ad in the next e-newsletter that the NCA sends out. (note I included my contact info but if another is more appropriate, please replace).

The NCA Legislative Committee is looking for two additional committee members to help serve the NCA in this critical function. The committee members scan current legislative events that may impact dog ownership, breeding, and competition events. They help the membership increase their awareness and involvement in the legislative process by communicating events as they arise. The committee is especially interested in new members from regions that are focal points for anti-dog legislation and where we do not have current committee members residing. Some of these regions include areas covered by the regional clubs High Country, Heart of America, Old West, and Penn-Ohio. If members in other regions are interested, we encourage their applications as well. Please contact Kathy Grim at [grim5605@gmail.com](mailto:grim5605@gmail.com) by March 15 if you are interested in serving on this committee.

3. We would also like permission to transfer the legislative update information to an NCA blogsite we propose to create specifically for that purpose. The blogsite functionality would make it very easy to keep current, link to other relevant sites, and allow a forum for people to get involved (although we propose that it should be moderated so that other groups do not hijack it). We request permission to move forward with this effort and would like to ask that the committee have the authority to manage the postings without requiring prior approval for posts from the Board. We would, of course, expect to be responsive to any requests that the Board makes and implement any requests in a timely fashion.

Kind regards,

Kathy Grim on behalf of the Legislative Committee

## **Newf Ambassador Committee:**

### **Chris Plum – Chair**

The Newf Ambassador Committee would like the Regional Clubs Committee to pose the following request to its members, either by email or at their next meeting (we hope that everyone has a chance to answer, and it is not a voting item):

The purpose of the Newfoundland Ambassador Committee is to provide members of the general public with an opportunity to meet and see Newfoundland dogs and their owners. It does not provide breeder referrals or placements. Some regional clubs already have such programs. If any regional club asks that the Newfoundland Ambassador program NOT operate in their region, we will honor that request. In return we ask for the name of a club contact to whom any requests for information or meeting may be sent. We'd like the members of the Regional Club to provide us with their names through the Regional Clubs Committee of the Newfoundland Club of America.

Thanks,

Chris Plum, Chair
